Rules and Regulations

Preface

The KPOA Board of Directors has officially adopted the Rules and Regulations contained in this publication. The Declaration of Restrictive Covenants for Kenmure (Paragraph 44) provides the following statements relative to the establishment and enforcement of Rules and Regulations:

Rules and Regulations Must Be Consistent with the Declaration

The Board may from time to time promulgate reasonable rules and regulations respecting the restrictive covenants set out in this Declaration, but such rules and regulations shall be consistent with this Declaration and not in derogation of or intended as an amendment thereof.

Rules and Regulations Will Address the Use of Common Elements

The Board may from time to time promulgate reasonable rules and regulations respecting the use of the Common Elements, including exclusive use of part of the Common Elements (such as picnic facilities, if any) by a Property Owner and his or her guests, which exclusive use may be conditioned upon, among other things, payment of a fee.

Rules and Regulations Are Subject to General Powers of the Board

The Board may from time to time, without the consent of the Members, promulgate, modify, or delete rules and regulations applicable to Lots and Family Dwelling Propertys, Common Elements, administration and management of Kenmure, or Kenmure as a whole. Such rules and regulations shall be binding upon all Property Owners, guests of Property Owners, tenants of Property Owners, contractors and other guests until and unless overruled, canceled, or modified in a regular or special meeting by the vote of Members holding a majority vote in the Association. Such rules and regulations may be enforced by the Association in accordance with the Act, this Declaration and Bylaws, to include but not be limited to the imposition of fines and penalties pursuant to Sections 47F-3-102 (11) and (12) and 47F-3107.1 of the Act, after notice and an opportunity to be heard.

Common Definitions and Acronyms

Board refers to the Board of Directors of the Kenmure Property Owners Association, Inc.

Declaration refers to the Third Amended and Restated Declaration of Restrictive Covenants Governing Kenmure.

KCC refers to Kenmure Country Club including Kenmure 11 LLC, Kenmure 12 LLC and Kemper

Kenmure refers to the common property consisting of 1,400 acres, more or less, that is described in the Declaration.

KPOA refers to the Kenmure Property Owners Association, Inc.

KRMC, KARC, and KSC refer to the operating committees of KPOA, which are the Kenmure Road Maintenance Committee, Kenmure Architectural Review Committee, and the Kenmure Security Committee, respectively.

Property Owner is the same as a Lot Owner, as that term is defined in the Declaration. It refers to the owner or owners as shown on the real estate records in the office of the Register of Deeds of Henderson County, North Carolina, of a fee simple title to any Property situated within Kenmure.

Property refers to a Residential Lot (an unimproved parcel of land located in Kenmure restricted as a site

for a Single Family Residential Dwelling, as defined in the Declaration) or Family Dwelling Property (improved property used as a Single Family Residential Dwelling, including condominium living Propertys, as defined in the Declaration).

Other terms used but not defined in these Rules and Regulations will have the meaning as is provided in the Declaration. Any discrepancies between terms used in these Rules and Regulations and terms used in the Declaration will be resolved in favor of the Declaration.

KARC Decisions and Waivers

(KARC-00)

Kenmore Architectural Review Committee (KARC) shall review all plans for construction, improvements or modifications on any Property to ensure the plans satisfy the requirements of the Declaration and the Rules and Regulations. KARC will approve or disapprove the plans under the direction of the KPOA Board of Directors (BOD). KARC decisions are appealable **only** to the BOD. KARC decisions will only be overturned or reversed if the BOD determines that they are clearly made in error.

Plans deemed inconsistent with the Declaration or Rules and Regulations will only be given a waiver (allowed) with the approval of KARC and an affirmative vote of a super-majority (5) of the BOD. Any approved waiver shall not be deemed as precedent setting in respect to future KARC decisions.

KPOA shall have power to levy fees and charges payable by the builder or property owner for the services provided by KARC and to require deposits to ensure that construction and landscaping plans are completed as approved. KPOA also has the power to promulgate and enforce all reasonable and necessary rules and regulations and levy appropriate fines.

Adopted by the KPOA Board of Directors – March 22, 2024

Authority: Declaration, Paragraph 1

Trees (KARC-01)

KARC has the responsibility to protect and preserve the natural beauty of Kenmure. All decisions by KARC, with regard to the trimming and/or removal of trees and flowering plants, will be based on how the action impacts the community of Kenmure.

For the purpose of this rule, any plant in excess of 20 feet tall will be considered a tree regardless of species, and all rules regarding cutting, trimming, or topping must be followed.

All statements/requirements under this policy apply to all properties in the community, including vacant lots (Property), developer lots (Development Lot), existing houses, condominiums, villas, and cottages (Family Dwelling Property), and KPOA common elements.

Permit Process

The following is the procedure for a Property Owner (including the owner of a condominium or a villa) to request tree removal, tree trimming, and underbrushing. Please plan ahead and make an advance inquiry. Only under emergency conditions might KARC respond to same-day requests.

- The Property Owner should determine the scope of the request. If the Property Owner requires professional advice, a licensed arborist should be consulted.
- The Property Owner must verify that the affected trees are on his or her property.
- Trees across a property line may be approved, but only with agreement from the other Property Owner. The permit for tree work will be issued to the Lot Owner who owns the property where the trees are rooted.
- The KARC representative for Trees must be contacted for all tree work. Contact information can be found at the back of the Kenmure Directory or on KPOA website under KARC.
- In the case of a condominium or villa Property Owner, the Property Owner first needs to contact his or her HOA Board, who will then contact KARC regarding permit issuance.
- The KARC representative will arrange an on-site meeting with the Property Owner (and HOA representative) and prepare a written permit (NEH2 form) to be signed by both KARC and the Property Owner (and HOA representative) to define the project scope.
- If the Property Owner is unable to meet directly with KARC, then an agent (realtor, family member, tree contractor) may act on behalf of the Property Owner with respect to the permit.
- In the case in which KARC believes that further review by committee is warranted, permit issuance may be delayed until the next monthly KARC meeting.
- Once the permit is issued, tree work may begin.
- At the time of work the Property Owner MUST present the permit to the contractor for its, his, or her signature. In this way, the Property Owner and the contractor accept joint responsibility for compliance with the permit. The Property Owner should retain the signed permit for his or her records.
- Only approved contractors from a list on the KPOA website may be used for tree work. Unapproved contractors may be allowed access by signing a form that they understand our rules agree to follow them.

Any contractor that does work not approved by KARC may be suspended from doing any work in Kenmure for such a period as determined by the Board or terminated as an approved Kenmure contractor.

General Tree Trimming and Removal Policies

KARC approval is required by the property owner for removal of trees greater than six inches in diameter as measured four feet from ground level and for native flowering plants.

KARC approval will generally be given when, in its sole discretion, the tree or plant:

- Is damaged, diseased, dead or dying,
- Is leaning toward the residential or other structure such as a deck, pergola, or patio,
- Poses a threat to the residential or other structure, or
- Is within 20 feet of a residential structure or within 10 feet of a driveway.

Trees authorized to be removed must be cut to ground level and removed from the lot or cut and stacked out of view of roads and neighbors.

Flowering Plants: KARC will generally reject the removal of native flowering trees and native flowering plants. These include, but are not limited to, magnolia, sourwood, dogwood, mountain laurel, azalea, and rhododendron.

Clear-cutting: Clear-cutting/under-brushing is strictly prohibited. "Clear-cutting" is the cutting down and removal of every, or nearly every, tree in an area. Clear-cutting/under-brushing is the removal of every, or nearly every plant/bush/shrub in an area. This may be allowed in conjunction with an approved landscaping plan.

Lollipopping: Trimming up (limbing up) of trees is allowed only in the lower 2/3 of the tree and must be approved by KARC in writing prior to the commencement of any work. Trimming in the upper 1/3 of the tree is prohibited.

Topping: The practice of removing the tops of trees ('topping') is strictly prohibited.

Shaping: "Shaping" of trees is ONLY allowed for Leyland cypresses and arborvitae ("green giants"). Shaping must maintain the health of the tree and be aesthetically pleasing. Consult an arborist to determine the best manner for shaping your trees. Major shaping may only be done in the winter months to avoid heat and sun damage to trees. All shaping of trees requires written KARC approval. Regular maintenance and minor trimming may be done without prior KARC approval.

Emergencies: Emergency situations that may cause injury or damage to person or property (such as hanging large, broken branches or downed trees due to wind or ice) are an exception and may be removed immediately but must be reported and approved by KARC in writing as soon as possible after commencement of work.

Maintenance: Routine landscape maintenance (trimming of shrubs and small ornamental trees under 20 feet in height) are exempt from the permit process set forth above and does not require KARC approval.

KARC will always try to work with Property Owners to find solutions that maintain the safety, health, and

beauty of Kenmure's trees. However, there may be overriding circumstances that result in the denial of a tree trimming or removal request, including the following:

- ***Environmental impacts.*** If removal of trees would cause erosion, slope instability, damage to sensitive species, or other negative environmental impacts, the request may be denied.
- ***Viewshed impacts.*** If removal/trimming of trees would cause a noticeable change in the viewshed of Kenmure (as seen by neighbors and/or community members), the request may be denied. Tree removal/trimming that would impact the privacy of a neighbor's home, or tree removal that would result in a home being more visible from the golf course, would fall under this rule.
- ***Area Impacted.*** If removal of trees would impact an overly large area, the request may be denied.

Removal or Trimming of Trees and Native Flowering Plants to Maintain, Restore, Create, or Enhance Views at Existing Houses

Trees, including native trees and native plants, shall not be removed or trimmed to create or enhance a view corridor without prior written KARC approval. When notified, KARC will make an on-site inspection and may make a photographic record of the current property conditions. The reasonable removal of trees, native trees and native flowering plants for creation, restoration, or enhancement of a view corridor may be permitted when it will enhance the value of the property and have no significant negative impact on neighbors or the overall value and natural beauty of Kenmure. The creation or restoration of a view corridor of up to 20 degrees may be approved. Permission to create or restore a view corridor in excess of 20 degrees will not be granted, regardless of the width of the area to be cleared. View corridors may under no circumstances exceed 100 feet at their widest point. View corridors will be measured from tree trunks, not foliage. Native shrubs and groundcover will be preserved.

KARC may require that the Property Owner, at the Property Owner's expense, engage a registered/certified arborist to advise both the owner and KARC as to the appropriate trees, including native trees and native flowering plants, to trim or remove to create or enhance a view corridor. If native trees and native flowering plants are removed to create or enhance a view corridor, KARC also may require that the Property Owner plant on the property other native plants and trees that will not encroach upon the view corridor.

Removal or Trimming of Trees and Flowering Plants on Undeveloped Residential Lots

KARC written approval is required before subject lots can be cleaned up by clearing brush, fallen trees, and/or removing any trees. In the absence of specific building plans that have been approved by KARC in writing, all trees and native flowering plants (as noted above) and landscape shrubbery may not be removed.

As an exception to this requirement, when the undeveloped Residential Lot is adjacent to and owned by the same resident of an existing house, then the rules applicable to the undeveloped lot will be the same as the existing house.

In general, requests to clear undeveloped Residential Lots to create views will be denied unless work is minimal (*e.g.*, removal of vines and small branches).

Removal or Trimming of Trees and Flowering Plants for Construction

Prior to the issuance of a building permit, the contractor shall stake the footprint of the house (including decks and patios), driveway, septic field, area to be cleared, and construction parking area. Trees and native flowering plants to be removed or trimmed will be marked with flagging. The limit of the area to be cleared shall be staked in such a way that the stakes will remain after the completion of clearing.

When notified, KARC will make an on-site inspection and may make a photographic record of the original property conditions.

The guidelines set above will be followed for KARC approval on new construction sites:

- Within the footprint of the septic field
- Within the footprint of the house plus 20 feet
- Within the footprint of the driveway plus 10 feet
- Within the footprint of slopes that must be cut or filled for construction

Requests to remove trees or flowering plants exceeding the 20 and 10 foot rules described above will be considered by KARC if the root system of trees/plants will be damaged during the construction process to the point where trees/plants may die. Any additional removals not permitted will require remediation by the Property Owner prior to a certificate of occupancy being issued.

KARC approval, in writing, is required by the Property Owner prior to the commencement of any work for removal of trees, including native trees and native flowering plants.

Removal or Trimming of Trees and Native Flowering Plants During or Upon Completion of Construction to Create Views

Trees, including native trees and native flowering plants, shall not be removed or trimmed to create a view without prior written KARC approval. At such time as the contractor shall have finished framing the home or thereafter, KARC will make an on-site inspection and may make a photographic record of the current property conditions. The reasonable removal of trees, including native trees, and native flowering plants for creation of a view corridor may be permitted when it will enhance the value of the property and have no significant negative impact on neighbors or the overall value and natural beauty of Kenmure. KARC may require that the Property Owner, at the Property Owner's expense, engage a registered/certified arborist to advise both the owner and KARC as to the appropriate trees, including native trees, and native flowering plants to remove or relocate to create or maintain a view corridor and to provide for long-term maintenance of a view.

Violations and Remedies

Each tree, including native trees and native flowering plants, removed, topped, or trimmed requiring KARC written approval prior to work and for which such approval was not obtained by the Property Owner, or which the Property Owner has negligently or intentionally damaged, the Property Owner shall, after written notice and opportunity to be heard, be liable to KPOA for a fine for each violation and as provided in Section 47F-3-102 (12) of the North Carolina Planned Community Act, and for replacement of each tree, native tree, or

native flowering plant so removed and remediation or replacement of those improperly topped or trimmed in accordance with the requirements of KARC. The fine for each violation shall be defined as an amount not to exceed \$100.00 per day per tree or native flowering plant and may also include the requirement that any tree(s) or shrub(s) removed shall be replaced with one or multiple tree(s) or shrub(s) planted equaling the same total caliper of trees or shrubs removed. Failure to complete the replacement and/or remediation plan prescribed by KARC shall constitute a continuing violation for which cumulative daily fines may apply.

Authority: Declaration, Paragraph 1

Residential Building

(KARC-02)

General Construction

Uniform construction standards apply to all homes being built in Kenmure. These standards are detailed in this section.

Building Materials: Log cabins, modular Propertyts and manufactured homes are not permitted. Exterior wall materials must be predominantly natural wood, cement plank, stone, brick, or stucco. Synthetic, cultured, or prefabricated stone and certain precast concrete materials may be used as accents on exterior surface areas. Vinyl or aluminum siding will not be permitted.

Roofs constructed of metal are only permitted on a case-by-case basis and in the sole discretion of KARC. An owner must make a specific written request to KARC that includes all details and aspects of any proposed installation of a metal roof be it Standing Seam or coated Metal Shingles. KARC must approve any such request. If KARC denies the request, then such denial is a final decision. Standing Seam Metal roofs must meet the following conditions: The system manufacturer warrants for at least seven (7) years against color or texture change, reflective sunlight glare, and warping or buckling. Standing Seam Metal roofs shall be coated with Kynar 500, its equivalent or better, applied by the manufacturer. Except for copper, only non-reflective finishes will be approved. Only copper accent roofs may be left unfinished to weather naturally.

Exterior Colors:

Requirements

- An overarching principle relating to structures to be built on Residential Lots or that are already built on Family Dwelling Propertyts is that they must blend harmoniously with the mountainous and forested environment of Kenmure. All exterior colors on such structures must therefore satisfy the requirements set forth below. "Exterior colors" include the colors used on exterior walls, trim, doors, windows, gutters, decks, railings, and roofing of any structure.
- Exterior colors for structures must, in KARC's judgment, harmonize with Kenmure's natural wooded landscape and with the built environment, such as by use of earth tones that fall into the categories of beige/brown, muted forest greens, gray tones, or similar. Accent colors (e.g., colors on front doors) may be of contrasting colors if used sparingly, but may not conflict with the overarching principle referred to above. In no event, however, will colors be approved if they vary greatly from the standard of color and tone that harmonize with Kenmure's natural and built environment.
- For general guidance on shingles and siding, stark white, off-white, black or near-black, bright pastels, highly saturated/intense colors, and colors approaching primary colors (e.g., red, blue, yellow) will not be approved. Strong contrast between siding and trim colors is not acceptable. Off-white and other tones that would not be approved for siding, but which appear pleasing in combination with the siding color, may be acceptable for trim.
- High-gloss finish paints are not acceptable. Exterior paints shall be one of flat, matte, low-luster, low-gloss, or satin finish. Exceptions: a semi-gloss paint may be approved for trim, and a semi-gloss clear finish is allowable for stained wooden exterior doors. Note that flat finishes reduce the amount of light reflected by the paint and reduce the paint's brightness, so an otherwise unacceptable color might be approved if offered in a flat finish.
- An exception to the guidelines for acceptable colors above will be for alteration projects that require

repainting less than 25% of the total painted exterior-wall surface of the home. In these cases repainting the affected area to precisely match the existing house color will be approved, even if the color might not meet approval for new construction or a major repainting.

KARC Approval Process

BOTH NEW CONSTRUCTION AND REPAINTING OR RE-STAINING OF EXISTING STRUCTURES, AS PROVIDED BELOW, REQUIRE REVIEW AND APPROVAL BY KARC COMMITTEE MEMBERS BEFORE WORK BEGINS ON THE STRUCTURE.

- Exterior colors proposed for new construction require KARC approval before work begins on the structure. Tentative approval will be based on paint-blend numbers and a sample chip; final approval will be based on inspection of an actual patch (measuring at least 3 by 5 feet) of the color painted on the surface of the structure once construction has begun. Additionally, requests to use custom colors should be accompanied by a separate, portable painted sample with two coats of the proposed color(s) on a wood surface of approximately 8 by 10 inches for KARC use in comparing the completed paint work to the approved colors if any questions arise.
- Once final approval has been granted, any change in plan (e.g., lightening or darkening a hue) requires filing a new application.
- Repainting or re-staining existing structures also requires KARC approval, but may be based on a paint-blend number and chip if the reapplied color will be an exact match.
- Review and approval, if judged appropriate, of all exterior color requests shall be by a KARC subcommittee of at least three members.
- Simply because a color is currently visible within Kenmure does not mean that color will be approved for new requests.
- Previous color approvals by KARC are not binding precedents for reviewing new requests. Requests are judged case by case for their setting and for compatibility with KPOA's general guidelines on maintaining a visually harmonious community.

KARC's request-and-examination process reflects the reality that there is no feasible way to establish and maintain a definitive list of acceptable colors (short of dictating a finite set of specific paints that residents must select from, with no others permitted). Paint manufacturers offer literally thousands of named colors, and countless custom mixes are possible by blending. Even if a detailed list of acceptable colors were practicable, and even if there were no variations in color perception among observers, other factors combine to make a multi-observer, on-site viewing of proposed colors essential to ensure a fair, flexible, and reasonable process for residents while maintaining compliance with KPOA's general color guidelines. For example:

- A given color looks different on different materials, in different light, or in different settings (e.g., shaded among trees versus sunlit on an open tract, or standing apart versus in proximity to other houses).
- Stain applied to siding will appear less intense than a similar-hued solid paint would if applied to the same surface.
- The larger the painted surface, the more intense the color will appear.
- Paint makers' color chips can be deceiving: they may have faded in the store, or the maker may have reformulated the color since the chip was made.

These variables are among the reasons for KARC's approval process requiring an on-site visual inspection of a painted sample of the proposed color on the home. (Exception: If a resident is proposing

repainting or re-staining exactly in the previously approved color, then KARC may, in its sole discretion, base its approval on the paint maker's specific color number and a sample chip without requiring inspection of a sample patch painted on the structure.)

Due to the requirement that at least three KARC members approve all exterior color choices, the approval process may take additional time. While KARC will attempt to review all submissions within a reasonable period of time, due to scheduling issues the process may take several weeks. Please plan accordingly.

Roof Attachments: Roof stacks, sheet metal flashing, metal chimneys, and plumbing vents should be painted to match roof color (except if copper or lead) and shall be located on roof slopes away from main streets. All fireplace vents, furnace stacks, and other roof penetrations four inches in diameter and larger shall be disclosed on the elevation drawings for review by the KARC.

Roof Pitch: The pitch of a roof should not be less than 6 inches vertically in 12 inches horizontally (6/12), unless there are special design considerations that KARC concludes would justify slightly less pitch.

Attached Structures: All decks, posts, rails, and similar attached structures shall be painted or stained to match the exterior color or trim of the house.

Concrete Surfaces: All exterior surfaces of poured or precast concrete foundations and retaining walls shall be covered with stucco.

Similar Architectural Designs: Identical or nearly identical houses will not be permitted within the lesser of line of sight or one-quarter mile from each other.

Adjacent or Attached Structures: In an effort to maintain the attractiveness of the community and to address the concerns of neighboring properties, KARC has established standards for adjacent or attached structures to the dwelling.

Driveways: All driveways and parking areas must be approved by KARC and KRMC. Driveways and parking areas must be paved with black asphalt, natural (uncolored) concrete, or earth tone pavers. Any other material must be approved by KARC in writing before construction begins.

Electrical Requirement: Each house must have a minimum 200 AMP electric service supplied by Duke Energy or its successor that normally supplies electric service to Kenmore.

Screening Requirements: All window air conditioning Units must be screened from roads and from neighboring lots. Compressor Units shall be ground mounted. Approved fencing or plantings can screen compressor Units. Fencing of any kind or purpose shall be submitted to KARC for approval and specific conditions apply. Please see Fencing Rules KARC-03. Firewood shall not be stored in front yards and shall be shielded from view from adjacent lots.

Dams for Streams: KARC may permit construction of dams on existing streams as long as the dam does not exceed 12 inches in height from the original stream bed and no water flow control measures are installed.

No applications for a dam will be approved by KARC unless accompanied by written approvals from the Army Corps of Engineers and the North Carolina Department of Natural Resources.

Construction Completion and Occupancy

In order to obtain an **Occupancy Permit**, a Property Owner must submit documentation for each of the following to KARC:

- A **Certificate of Occupancy** issued by Henderson County; if the dwelling is within the Village of Flat Rock, Property Owners must also provide a **Certificate of Occupancy** issued by the Village.
- A **Moving Van Access Form (Form NEH 10)** will not be issued until Occupancy Permit has been issued.
- Evidence that **permanent power** is being supplied to the home.
- An **approved landscape plan**, including a final driveway plan and provision for drainage. This must be submitted to KARC not less than two (2) months prior to the home construction's anticipated completion.
- An **installed mailbox** meeting KARC and KRMC requirements with readily visible street numbers on the mailbox or conspicuously posted on the home.

Fencing/Outside Play Equipment

(KARC-03)

Fencing

In order to preserve the natural beauty of our community, there shall be no fences built in Kenmore unless approved by KARC. Fencing requests must be submitted on Form NEH5 (Fencing Application) available in the Forms Section on the KPOA website. If applicable, condo association approval is required prior to KARC approval.

If approved, the fence must meet the following requirements:

1. Fences may only be placed on the side or rear of the house; no fencing is permitted in front of the home.
2. Fence must be fully screened from view from neighboring residences and Kenmore roadways with evergreen plants.
3. It must not be visible from any Kenmore road.
4. It must be minimally visible from nearby residences.
5. Applicant must notify owners of immediately adjacent neighboring properties of their plans prior to KARC's consideration of the request and the installation of any fence. The notification must include a copy of the plans to be submitted for approval, acknowledgement of this notification must be evidenced in writing on the NEH5 request. Any deviation from the plans submitted to neighbors or KARC will result in a demand for the fence to be immediately removed.
6. Fence is not taller than 4 feet (Exception: Fences bordering Kenmore community perimeter may be 6 feet high)
7. Fence is of acceptable fencing material: *i.e.*, wrought iron, steel or aluminum in a dark color. (wood, chain link, or synthetic materials are not allowed)

Use of invisible fencing is strongly recommended if necessary for pets as an alternative.

Play Equipment

Installation of all outside play equipment (basketball backboards, soccer goals, racket nets, gym sets, etc.) must be approved by KARC. If approved, it must meet the following requirements:

1. It must be placed at the rear of the home when possible and meet setback requirements.
2. It must not be visible from any Kenmore road.
3. It must be minimally visible from nearby residences.
4. It must be natural colored, browns and dark greens that blend in with the natural colors of the landscape, no bright colors, including swing seats, slides, goal frames, etc.
5. Sensitivity should be shown for neighbor views. Landscape screening with evergreen plants is required.
6. Applicant must notify owners of immediately adjacent neighboring properties of their plans prior to KARC's consideration of the request and the installation of any outside play equipment. The notification must include a copy of the plans to be submitted for approval, acknowledgement of this notification must be evidenced in writing on the NEH5 request. Any deviation from the plans submitted to neighbors or KARC will result in a demand for the play equipment to be immediately removed.

If possible, the use of moveable equipment is preferred which should be stored away out of sight when not in use.

Revised and Approved by the KPOA Board of Directors – April 22, 2022

Authority: Declaration, Paragraph 7.B.

Awnings

(KARC-04)

Because outside decks are often exposed to direct sunlight and heavy rainfall, awning protection is permissible.

Requirements for Awnings

The following requirements must be met before awnings are approved:

- Type-Retractable awnings, if practical, are recommended
- Material shall be a cloth-type fabric. Aluminum or vinyl is not permitted.
- Color shall be solid, moderate, compatible with the forest setting and blend with exterior color of the house or condominium. Stark white, off-white, patterns, stripes and pastel colors will not be approved.
- Awnings over swinging doorways or windows are not permitted. Awnings must maintain the present elevation profile and not extend more than 12" beyond existing deck structure.

Approval Process for Awnings

Awnings require the prior written approval of KARC. An application showing the floor plan with the location of the proposed awning is required and shall include a sample of the awning material, showing color and quality. A photograph of the side of the house, condominium, villa, or cottage where the awning is to be installed shall be attached to the application.

Adopted by the KPOA Board – August 18, 2003

Revised and Approved by the KPOA Board of Directors – November 21, 2008

Revised and Approved by KPOA Board of Directors – September 15, 2017

Authority: Declaration, Paragraph 7

Exterior Alterations/Additions to Existing Houses, Condominiums, Villas, or Cottages and the Use of Dumpsters/Portable Toilets

(KARC-05)

Exterior Alterations or Additions

Any exterior alterations or additions, other than landscaping within the general scope of the original plan, require written KARC approval prior to implementation. Submit changes to KARC, in writing, on the indicated Form prior to any alteration. KARC, at its sole discretion, may require a refundable deposit of \$1,500 for any exterior alterations or additions requiring the use of significant amounts of heavy equipment. Any new building or other structure, attached or unattached, will require a non-refundable Road Impact Fee for normal wear and tear to Kenmure Roads based on the total square footage under roof (see Kenmure Building Permit Form NH2). These changes include but are not limited to the following:

- Major landscape alterations (Form NEH 1)
- Tree Cutting and Shrub Removal (Form NEH 2)
- Awnings (Form NEH 3)
- Fencing - See KARC-03
- Major Mailbox alterations (Form NEH 6)
- Paint Color – generally, only subdued tones that are moderate and compatible with the forest will be approved. (Form EH04) – See KARC-02 for the full exterior color rules.
- Exterior Walls and Stonework (Form NEH 4)
- Roof Color and Material (Form EH06)
- Exterior Wall Materials (Form NEH 4)
- Windows and Doors, except direct replacement (Form NEH 4)
- Any new building or other structure, attached or unattached (Forms NH1, NH2, NH3, NH5, NH6)
- Patios, Gazebos, Arbors and Pergolas (Form NEH 4)
- Decks (Form EH05)
- Driveway Repair/Relocation (Form NEH 4) – Requires KARC and RMC approval -See KARC 02 for the full rules.
- Decorative Features, if visible from any street (Form NEH 4)
- Flagpoles may be installed with the approval of KARC, and cannot exceed twenty feet in height measured from the surrounding natural ground area.
- Play Equipment – The installation and placement of basketball goals, soccer goals, racket nets, gym sets, etc., shall not be installed without the approval of KARC. - See KARC-03.

Alterations to Condos — Portable Toilets/Dumpsters

When an alteration of any type to a condo requires a port-o-let and/or dumpster, the resident must notify the condo president on form NEH4 (dumpsters include trailers or any other device used to store debris). The time limit for these objects to be on the property is a maximum of 60 days without special approval. These objects may not be placed on the right of way. When the time limit is up KARC may demand the removal of the objects. Failure to comply will result in a \$100 per day fine.

Alterations to Existing Homes — Portable Toilets/Dumpsters

When an alteration of any type to an existing house requires a port-o-let and/or a dumpster, the resident must notify KARC on form NEH4 (dumpsters include trailers or any other device used to store debris). The time limit for these objects to be on the property is a maximum of 60 days without special approval. These objects may not be placed on the right of way. When the time limit is up KARC may demand the removal of the objects. Failure to comply will result in a \$100 per day fine.

Unattached Structures

Unattached structures are expressly prohibited without prior written approval from KARC. If an unattached structure is approved, it must be compatible with the style and color of the main house and it is highly recommended that it be attached to the main structure by a covered walkway. No trailer, tent garage, shed gazebo, pergola or any other building or structure (temporary or permanent) other than the single-family dwelling is permitted on any lot without the approval of KARC.

Construction Approval

(KARC-06)

KARC shall approve, in advance and in writing, all construction and exterior building alterations. KRCM shall approve, in advance and in writing, all alterations to rights-of-way.

New Construction Fee Schedule

NonRefundable Fees: (see Form NH3) \$500 administrative costs plus \$0.75 per Square Foot times the heated plus non-heated area as a Road Impact Fee for wear and tear of Kenmore roads

Basic Refundable Fees: (see Form NH5)

- \$2,500 landscape plan submission and successful on time completion (see Building Permit NH2)
- \$2,000 construction policy adherence deposit (see page 26 of *KARC Rules and Policies for Construction*)

Other Refundable Fees:

- \$2,000 new contractor to Kenmore or contractor returning (re-instated) from rescission of approved contractor status

Access the KARC forms on the KPOA website for additional information.

Driveway/Entrance Rules and Standards

Entrance Lights: Driveway entrance light posts and/or lights must be located a minimum of 10 feet from the edge of the road surface and must be shown on the site plan.

Curbs or Impediments: No driveway curbing, large rocks, culvert headers, or other impediments may be placed in the right-of-way as part of the driveway construction or landscaping. Driveway curbing cannot be within 24 inches of the road.

Culverts: Every driveway access shall use a size 15-inch diameter culvert under the driveway at a location specified by the RMC, with a minimum length of 20 feet of corrugated metal pipe or H20 loading double-wall plastic pipe, unless otherwise noted on the approved site plan. It is also the Property Owner's responsibility to keep the culvert clean of leaves and other debris.

Mud Mats: The contractor must install a gravel mud mat and gravel driveway as soon as the driveway is cut. An adequate level of gravel must be kept on the mud mat during construction to keep mud off the roadway. The gravel shall be 2 ½ aggregate or larger at the mud mat. If mud is tracked onto the roadway, the contractor shall remove it by the end of the workday.

Drainage Rules and Standards

Drainage Ditch: All lots at or above the grade of the road must have a drainage ditch constructed by the contractor along the front of the property line to allow water to drain off of the right-of-way. Corrective measures must also be used to prevent the flow of mud or silt or other debris onto either the roadway or adjoining properties.

Lot Drainage: The contractor and the Property Owner are responsible for constructing the home in such a way that drainage from the lot, and from the road and unpaved right-of-way, does not adversely affect the Property Owner's property, the road and unpaved right-of-way, or any adjacent property. The contractor shall consider the natural flow of water from the Property Owner's lot, from the road, and along the unpaved

right-of-way when designing the home location on the lot, installing the driveway, and constructing other structures near the right-of-way.

Drainage Responsibility: The KPOA does not assume any responsibility for the failure of any Property Owner, architect, or contractor to properly or adequately address drainage issues at the home site. Where no drainage problems existed prior to the building of a home, neither KARC nor KRMC is responsible for correcting drainage problems created by construction or which appear after the home is completed.

Structures to Prevent Damage from Water Flow: Where the natural flow of water from the lot, or from the road and along the unpaved right-of-way, would be altered by home and driveway construction, the contractor and the Property Owner are responsible for installing culverts, ditches, driveway curbing, and other structures to prevent that flow of water from damaging the road, the unpaved right-of-way, or adjacent properties, including the Property Owner's property.

Construction Parking Rules and Procedures for Use of Right-of-Way

Parking Location: Parking by the contractor and all sub-contractors must be accommodated on the lot. If overflow parking is required on the right-of-way, the KRMC must first be contacted for approval. KRMC will designate where parking will be allowed. Both traffic lanes must be open at all times.

Damage Repairs: Any ruts created by parking on the right-of-way must be filled in, raked, seeded, and covered with straw prior to return of the refundable deposit or remaining portion thereof. Any damage to asphalt road surface is the responsibility of the contractor and will be either repaired by the contractor to KRMC specifications, or arrangements made to pay the KPOA through the KRMC for the estimated cost or repairs.

Construction Equipment Placement: Except as permitted by KARC, construction equipment, building materials, and portable toilets are prohibited on the right-of-way and must be placed on the lot. Construction vehicles, including trailers, may not be parked on the right-of-way outside of authorized contractor working hours. Dumpsters must be placed a minimum of 10 feet from the edge of the road pavement.

Parking Regulations: Construction parking must follow KPOA General Parking Regulations listed in the Kenmore Security section of this document.

Landscape Guidelines and Rules

(KARC-07)

Existing Homes

A modification to existing landscaping disturbing more than 250 square feet of the existing landscaping requires KARC approval. Submit form NEH 1 and/or NEH2 (Tree Removal and Shrub Removal Form) with one copy of your landscape design plan to KARC for review.

Any proposed changes of existing materials or additions to the site involving fences, water features, lighting, outdoor structures, communication satellite devices, driveways, walks, statuary, and landscape structures must be approved by KARC.

All landscape design plans for existing homes must also comply with the guidelines outlined in the **New Home Landscape Guidelines and Rules for New Home Construction** (as outlined below).

New Home Construction

The forested environment of Kenmure is generally naturalistic and beautiful in its simplicity. Special care must be taken to protect the existing native forest, vegetation, topography and natural drainage.

Therefore, all improvements should be planned to minimize the alteration of the land, as well as the impact to the environment while maintaining its natural beauty.

All areas of the lot disturbed as a result of construction must be landscaped. A landscape plan shall include all existing and proposed hardscape and softscape. Softscape is defined as all plant material such as trees, shrubs, ground covers, annual and perennial flowers, turf grasses, and mulch. Hardscape refers to driveways, walkways, paths, planters, retaining walls, boulders, decks, arbors, pools, water features, irrigation, landscape lighting, etc.

KARC suggests a landscape architect or professional prepare the landscape design and construction documents. This ensures that the drawing will be expressed in a standard graphic language that communicates the intent of the design in a manner that the committee will understand. If the submitted plan does not clearly communicate your proposed landscape design, the committee reserves the right to reject your plans and require that they be prepared by a professional and resubmitted.

The site plan is independent of the landscape plan and must be included with the architectural house plan submission. See the KARC Home Design Application NH1.

Landscape plans must be drawn to 1"=10' (min.) to 1"=2' (max.) scales with North indicator and must convey a scaled representation of all planting material. Symbols used on the drawing must have a schematic list identifying each symbol. In addition, the plan must include a plant schedule (listing) identifying species, common name, variety, quantity, and size – trees in caliper of the diameter of the trunk with height indicated from top of root ball and plantings (shrubbery/bushes) in gallons. Plans shall also show the footprint of the house, location of landscape lighting, water features, HVAC Property, satellite dish, walks, fences, pools, decks, patios, retaining walls, arbors, planters, etc. Adequate **evergreen** plant screening must be provided for generators, HVAC Property, satellite dishes, gas and electric meters. Mulch must be organic ground hardwood or softwood and natural in color. Pine straw may also be used as mulch. Crushed stone or rock may not be used as mulch, but may be used for paths and walkways. The contractor must be responsible for location of

existing utilities before excavating. All tanks must be buried.

Landscape plans must be submitted to KARC for review and approval no later than 90 days prior to requesting the Kenmure Occupancy Permit. Landscape plan approval is a requirement for the Kenmure Occupancy Permit. All landscape construction and landscaping must be completed no later than 90 days after home construction is completed and the Property Owner has received the Kenmure Occupancy Permit. Refund of any portion of the landscape deposit will only occur after all landscape improvements have been completed within the 90-day time limit and inspected by KARC.

The landscape plan shall be robust and appropriate to the site with a goal of replenishing the disturbed land, native trees and shrubs. A generous proportion, size and mixture of plants, shrubs, trees, and ground cover should be used.

Softening the impact of building foundation and support piers/posts (decks) with plantings is required. Planting the equivalent of 75 percent of the house footprint is preferred. Foundation planting must be a combination of one (1) to five (5) gallon plants with a minimum of fifty percent (50%) to be five (5) gallon size or at least five feet (5') in height. KARC may require additional selections of mature (larger) species or sizes of trees and shrubs depending on the scale of the home and disturbed area of the site.

Plant materials should be selected with consideration of their ultimate size and compatibility with native plants, tolerance to Kenmure mountain growing conditions, invasive potential, resistance to drought, and potential damage by wildlife.

Storm water drainage systems in the immediate area of the site must be integrated into the overall landscape design. Poor drainage systems can create a variety of problems for Property Owners, including water flowing into the home, wet walls in areas below grade, washout of plant material, and undermining of drives, walks and culverts. It is the Property Owner's responsibility to ensure that landscape and building plans make provision for the control of storm water. The following are concepts that must be taken into consideration:

- Water must be directed away from foundations but water must NOT be directed onto neighboring properties and/or Kenmure roadways.
- Direct runoff should be designed to assist irrigation where possible.
- Gutters with captured downspouts are required and must direct water away from the foundation in buried pipes that daylight into riprap (rock) designed to prevent erosion.
- Direct water away from septic tanks and fields.
- Boulder retaining walls must use landscape fabric to prevent soil erosion and wall failure.
- Native sedimentary boulders found during site excavation may not be suitable for retaining walls as they break down when exposed to the elements.

Authority: Declaration, Paragraph 7.B.

Wind Turbines

(KARC-08)

Kenmure discourages wind turbines, both because inconsistent winds in this area do not generally support profitable operation and because wind turbines are inconsistent with the wooded atmosphere that is fundamental to Kenmure. However, they will be considered under the following limitations:

- Special use zoning permit from Henderson County is required.
- Maximum height above roof peak is 10 feet.
- Maximum turbine diameter at blade tips is 6 feet.
- Manufacturer certification of no sound and no vibration is required.
- At wind speeds above 42 MPH the blade Property must turn parallel with the wind direction
- Property may be pole or roof mounted. If roof mounted, the maximum wind load of each tripod foot connection shall not exceed 100 pounds (manufacturers certification).
- No more than one (1) turbine shall be installed on a single lot and that turbine must have a payout that makes practical sense.
- Must otherwise be consistent with North Carolina ridge law.

Submit with an application for wind turbine approval a lot plan showing the location of the proposed wind turbine and details concerning meeting the above limitations, including an approved Henderson County Special Use Permit. Include a description/specifications of material, showing color. Attach a photograph of the side of the house, or other location, where the wind turbine is to be installed.

On receipt of the application and required submittals, KARC will review the same at a regularly scheduled meeting, and give its decision for final action, normally within two weeks.

Approved by the KPOA Board of Directors – January 5, 2012

Authority: Declaration, Paragraphs 7 and 17

Flags and Flag Poles/Antennae

(KARC-09)

Flags and Flag Poles

In accordance with the North Carolina Planned Community Act, 47F-3-121(1), display of the flag of the Propertyed States or North Carolina is permitted. The size of the U.S. or N.C. flag shall be no greater than four feet by six feet. Flags must be displayed, in accordance with or in a manner consistent with the patriotic customs set forth in 4 U.S.C. §§ 5-10, as amended. The term "flag of the Propertyed States" is defined in 4 U.S. C. §§ 1-3, *i.e.*, the U.S. flag has thirteen horizontal stripes, alternate red and white, and a union consisting of white stars on a field of blue.

Under the Kenmure Declaration, paragraph 9: "No decorative features such as sculptures, bird baths, bird houses, fountains or other embellishments shall be permitted that are visible from any street unless approved in writing by KARC." Flags other than the U.S. Flag or the North Carolina flag are embellishments. The following types of flags (no greater than four feet by six feet) are permitted:

1. The Kenmure flag;
2. Official U.S. Military Service Flags, including those flags representing military authority or command (See, Flags of the Propertyed States Armed Forces (only Service flags and Personal flags);
3. US State flags;
4. University and college flags; and
5. Garden Flags no larger than 12" x 18" with garden, nature, or seasonal motifs.

All other flags are prohibited unless approved in writing by KARC.

This Rule applies to owners of property who display permissible flags on property owned exclusively by them and does not apply to common areas, easements, rights-of-way, or other areas owned by others. Flag poles may be installed with the approval of KARC and cannot exceed twenty feet in height measured from the surrounding ground area.

Antennae and Such

Satellite receptacles, ham radio, and citizen band radio antennae must be placed so as not to be visible from any Kenmure road or by any neighboring Property. KARC may approve installation providing a landscape plan of evergreen plants for hiding the equipment is submitted.

Authority: Declaration, Paragraphs 7 and 9; North Carolina Planned Community Act, 47F-3-121(1)

Exterior Lighting for both New Home Construction and Additions to Existing Houses, Condominiums, Villas or Cottages

(KARC-10)

Exterior Lighting Alterations/Additions/New Construction

It is KARC's responsibility to protect and preserve the natural beauty of Kenmure and the quiet enjoyment of life by its residents. All decisions by KARC, with regard to exterior lighting, will be based on how it impacts the commProperty of Kenmure.

The purpose of this Rule is to provide regulations for outdoor lighting that will:

1. Permit the use of outdoor lighting that does not exceed the minimum levels specified in IES recommended practices for night-time safety, security, and enjoyment.
2. Minimize adverse offsite impacts of lighting such as glare and light trespass, and obtrusive light.
3. Curtail light pollution, reduce sky glow, and improve the nighttime environment.

General Requirements

The use of dusk-to-dawn light sensors for exterior lighting other than landscape lighting is prohibited. All exterior lighting should be located to cause minimal impact to adjacent properties, roadways and street traffic. All fixtures attached to the building shall be of a traditional design consistent with the design of the structure and located at appropriate locations. All other outdoor luminaires shall be fully shielded. All exterior lighting shall not exceed the Kelvin color temperatures and lumen (wattage) output defined below. Opaque glass is recommended to reduce glare

Kenmure is a forested commProperty, as such, the use of bright lights that disturb the natural surrounding is prohibited. When installing or replacing lights a Warm or Soft White bulb should be used, as defined a "warm white" bulb is usually considered to be below 3000K (3000 kelvin). This is the light color provided by an incandescent bulb (2700K) or halogen bulb (2850K). Soft White bulbs that provide light at around 3000K to 3500K may be considered "white" or "soft white" under this rule. Bulbs that provide light at around 4100K to 5000K are considered "Cool White" and these start to have a slightly blue feel to them. Bulbs that provide light at around 6500K are considered "Daylight Bulbs" and these have a definite blue and cool sensation to them. Bulbs in the Cool White and Daylight categories are prohibited.

Area Lighting

Exterior light fixtures at entry doors, porches, post or carriage lights on walkways or at the foot of exterior stairways, low voltage landscape lighting and lights at the driveway entrance are considered area lighting and appropriate for safety. These types of fixtures shall have bulb lumens not to exceed 1,600 (100 watts). Where multiple bulbs are in a single fixture, the combined total wattage shall not exceed 1,600 lumens. Please see requirements for low voltage landscape lighting below. Area lighting is allowed at any time you or your visitors are outside after dark but should be turned off as soon as your outside activities have finished so as to not disturb neighbors or the natural surroundings. Area lighting, including wall sconces, but with the exception of driveway entrance and directly above entry doors to the house, should be extinguished not later than midnight. Driveway entrance and doorway lighting may be left on from dusk to dawn.

Landscape Lighting

1. Landscape lighting must be aimed away from adjacent properties.
2. Landscape "up lighting" is allowed with the restriction that the bulb must be in a shrouded

enclosure and installed facing the residence to avoid glare from the bulb that is visible from the neighbors or street traffic. This type of lighting should be extinguished no later than midnight.

3. Landscape lighting with shades that direct the light down toward the ground, mushroom type fixtures, may be used to light walkways, patios, and driveways. This lighting may be left on from dusk to dawn.
4. All landscape lighting fixtures shall use bulbs equal to 200 lumens (25 watts) or less.

Security Lighting

If security lighting is desired, it must be installed so that the arc of the light faces downward and shielded so as to prevent line of sight of the bulb(s) from the street or neighboring properties. Traditional flood light fixtures may be used for security but must be in a fully shielded enclosure and use bulbs which do not exceed 1,600 lumens (100 watts) and have a maximum Kelvin rating of 4,000. Multiple bulb floodlight fixtures are allowed provided they are installed with each light positioned at least 90 degrees from the other and meeting all the other requirements above. Each bulb in the floodlight will be treated as a separate fixture. Shielded directional flood lighting must be aimed so that direct glare from the bulb is not visible from the street or adjacent properties. Security lighting may be motion activated but its duration should be set to 5 minutes or less. In all cases non motion triggered exterior security/floodlighting should be extinguished not later than 11:00 PM.

By definition, all floodlights will be classified as security lighting regardless of where installed on the house or property.

Approval Process

- For new home construction a completed exterior lighting plan which includes fixture location, type, lumens and directional reference must be included with the NH1 Home Design Application. Exterior lighting will be reviewed for compliance prior to the issuance of a Kenmore Occupancy Permit.
- Changes to or additions to existing exterior lighting are considered an alteration and may be requested by completing a NH4 Alteration to Existing Home form and must include details of location, type, lumens, and directional reference for all new lighting, including landscape lighting.
- While existing lighting will be grandfathered, any lighting that causes annoyance complaints from neighbors will be investigated by KARC. If the complaints are well founded you will be required to correct the deficiency, which may include changing bulbs, repositioning the offending lights or changing the entire fixture.

When replacing bulbs in existing lighting, Kenmore residents must not replace bulbs with rating higher than those listed in this rule.

Lighting Plan Guidelines

- The Lighting Plan should be depicted on a site plan, indicating the location of each current and proposed outdoor lighting fixture with projected hours of use.
- Type and number of luminaire equipment (fixtures).
- Lamp source type (bulb type, *i.e.* high pressure sodium), lumen output, wattage and kelvin rating.
- Mounting height with distance noted to the nearest property line for each luminaire.
- Total Lumens for each fixture.

According to the Department of Energy:

- To replace a 100 watt (W) incandescent bulb, look for a bulb that gives you about 1600 lumens. Replace a 75W bulb with an energy-saving bulb that gives you about 1100 lumens.
- Replace a 60W bulb with an energy-saving bulb that gives you about 800 lumens Replace a 40W bulb with an energy-saving bulb that gives you about 450 lumens.

Adopted by the KPOA Board of Directors on May 21, 2021

Authority: Declaration, Paragraphs 7 and 22

Mailbox Installation and Replacement

(KARC-11)

The Kenmore mailbox standard is based on USPS Regulations and AASHTO Guidelines aimed at consistency and uniformity of materials used and at preventing serious injury or property damage. This standard will be enforced on all new home construction AND mailbox replacement installations. Key elements of the standard include mailbox location, box weight/size, size & permanence of the post, and its installation.

Recommended Mailbox Configuration

Approval will be based on "substantial compliance" in meeting the safety intent of this standard. Non-conforming mailboxes must be corrected.

<u>Item</u>	<u>Recommendation</u>	<u>Substantial Compliance</u>	<u>Not Permitted</u>
Box	· USPS Approved · Small or Medium Size · Metal or Plastic · Color - Black	· USPS Approved · Small or Medium Size · Metal or Plastic · Color - Earth Tone	· Box not USPS Approved · Box larger than 22"x8"x11" · Excessive weight · Bright or pastel colors
Post	· 4"x 4" wood · Optional cross arm · Optional paper slot	· 4"x4" extruded aluminum · Extruded / molded plastic (Color - Black or Earth Tone) anchored by 4"x4" wood post · 2-2 1/2" diameter pipe	· Wood post greater than 4"x4" · Wood cross arm greater than 4"x4" · Pipe post greater than 2-2 1/2" · Stone · Masonry · Concrete, stone or masonry base

Location	· Front edge of mailbox 8" to 12" from edge of road · Bottom of box 41" to 45" above road surface · Locate mailbox on same side of road as direction of the mail carrier route · If a corner lot, install mailbox a minimum of 100 feet from intersection	<u>Must Comply</u>	<u>Must Comply</u>
Post Hole Backfill	Backfill and tamp post hole with soil, no concrete or stone	<u>Must Comply</u>	<u>Must Comply</u>

Request for Approval of a Replacement Mailbox

The KPOA Mailbox Standards and a form to request approval of a replacement mailbox are available at the Forms link (Mailbox Guidelines) on the KPOA website (<https://kenmure.org/residents/guidance-docs-forms/>)

KARC approval must be received before installation of a replacement mailbox.

Procedures for Mailbox Replacement Damaged by a KRMC Contractor

Should a mailbox conforming to the above standards be destroyed in the course of ordinary maintenance of the road and right-of-way, KRMC will reimburse the Property Owner up to the cost of a standard replacement mailbox, not to exceed \$100.

Approved by the KPOA Board of Directors – March 15, 2004

Revised and Approved by the KPOA Board of Directors – November 21, 2008

Revised and Approved by the KPOA Board of Directors – October 28, 2025

Authority: Declaration, Paragraph 3.C.

Right-of-Way Landscape Alterations

(KRMC-02)

While Property Owners are encouraged to help beautify the unpaved right-of-way adjacent to their property, projects can only be undertaken after receiving written approval of a detailed plan submitted to KRMC. Any proposed activities/projects that would negatively affect drainage, safety, or aesthetics will not be approved. All costs associated with ROW alternation shall be borne by the Property Owner. KPOA shall retain ownership and/or control of the right-of-way, regardless of owner enhancements.

Standards for Alteration of the Right-of-Way

Project scope includes all changes or alterations to the right-of-way from its original condition. Examples include, but not limited to removal or addition of trees and other vegetation, addition of landscaping, permanent structures, rocks, sprinkler systems, and the initial planting of grass or initial spreading of mulch.

Material Placement: No plantings shall be added that will grow to within 4 feet of the edge of the road. Low growing shrubbery with a maximum height of 24 inches at maturity may be planted in the right-of-way, but it must be no closer than 4 feet from the edge of the road.

Size of Material: New trees and shrubbery larger than 24 inches tall at maturity may be planted in the right-of-way, but they must be a minimum of 10 feet from the edge of the road.

Material Height: Any grass or sod planted in the right-of-way cannot be higher than the road and must slope away from the road by 1 inch for each foot planted.

Approved by the KPOA Board of Directors – August 18, 2003

Revised and Approved by the KPOA Board of Directors – November 21, 2005

Revised and Approved by the KPOA Board of Directors – November 21, 2008

Revised and Approved by the KPOA Board of Directors – October 28, 2025

Authority: Declaration, Paragraph 3.C.

Right-of-Way Maintenance

(KRMC-03)

Projects or alterations completed in the right-of-way by a Property Owner are the sole responsibility of that Property Owner, and the Property Owner will be responsible for all maintenance and damage repair expenses associated with the alterations. Any repairs and associated costs due to damage by a storm to Property Owner alternated ROW will be the responsibility of the Property Owner.

Questions concerning right-of-way maintenance responsibility will arise, especially from new Property Owners of properties resold in Kenmure. New Property Owners may be unaware of inherited responsibility; however, homeowner improvements in the right-of-way pass to subsequent owners.

Procedures Related to Right-of-Way Maintenance

Culvert Maintenance: Property Owners are responsible for keeping their driveway culvert free of obstructions.

Leaf Removal: KRMC collects and removes leaves that have fallen in the right-of-way and may impede natural drainage along the right-of-way. Leaves deposited in the right-of-way by Property Owners or their contractors are the responsibility of the Property Owners to remove. If the KRMC is required to remove the leaves because of the Property Owner's failure to do so, then the Property Owner will be billed for the cost of removal.

Right-of-way Restoration: The Property Owner may be required to restore the right-of-way to its original condition if it has been altered without the prior written approval of KRMC. If the Property Owner fails to restore the right-of-way, then KRMC will handle the restoration and bill the costs to the Property Owner.

Utility Companies Working in the Right-of-Way: Utility companies periodically do work in the right-of-way, such as telephone, power, gas, water, and television companies. If the utility work will result in damage to the roadbed or ROW and/or blockage of traffic, they are to identify to the gatehouse security force the area to be worked. Kenmure Security will then notify the right-of-way repair person on KRMC of the work to be done. During their normal rounds, Kenmure Security will monitor the work being performed and notify the right-of-way repair person on the committee of any problems noted.

Property Owner's Right to Forgo Right-of-way Maintenance: If a Property Owner wishes to forgo maintaining a Property Owner-improved right-of-way, KRMC will describe its right-of-way maintenance responsibilities and then-current procedures. The Property Owner will be made aware that KRMC repair or maintenance procedures MAY result in reduction or elimination of landscaping enhancements in order to facilitate regular KRMC maintenance procedures. Upon a signed written agreement, KRMC will perform regular repair and maintenance within the right-of-way in accordance with maintaining a structurally sound and safe road system. However, this will NOT include the repair or maintenance of any landscaping enhancements installed by the Property Owner or predecessors. KRMC reserves the right to bill a Property Owner for the cost of restoring the right-of-way to a KRMC-manageable condition.

Authority: Declaration, Paragraph 3.C.

Right-of-Way Dead and Fallen Trees

(KRMC-04)

Basically, in North Carolina when a tree falls across multiple properties, each Property Owner is responsible for the cost of removal on their property. If the tree was previously documented as a hazard, the owner of the tree is normally responsible for all costs.

Procedures Related to Dead and Fallen Trees

- Any tree on Kenmure property (ROW, Common Elements, etc.) that falls will be removed by KRMC at KPOA expense.
- Any dead tree on Kenmure property deemed a potential risk will be removed by KRMC at KPOA expense.
- Any such tree fall from a private property that blocks the road will be cut and removed at least 10 feet off the edge of the road by KRMC at KPOA expense. Removal from the roadway will be done immediately in order to maintain road safety. Cost of removal for the remainder of the fallen tree will be the responsibility of the Property Owner(s).
- Property Owners are responsible for the removal of dead trees on their property that have the potential of falling onto the right-of-way or the roadway. KRMC will attempt to notify the Property Owners in writing if such a situation is discovered in the course of routine right-of-way inspections. This will provide early warning to assist Property Owners in disposing of possible safety hazards. If the work is not completed within the specified timeframe, or if the Property Owner cannot be reached, KRMC will contract to have the tree removed, and the Property Owner will be billed for the associated costs.

Revised and Approved by the KPOA Board of Directors – October 28, 2025

Authority: Declaration, Paragraph 3.C.

Curbing and Water Diversion

(KRMC-05)

Curbs, or structures installed along the edge of the driveway, and water diverters (typically asphalt, curb-like additions installed across a driveway to prevent water from running down the drive) must be installed at least 2 feet from the edge of the road surface and must not direct water onto the road or adjoining property.

No curbs are to be installed along the road without specific approval of Kenmure Road Maintenance Committee. Normally, such curbs will not be approved because they interfere with road plowing. In the event KRMC approves an exception, it will be the responsibility of the Property Owner to fund the cost of installation and to maintain them in case of damage.

NOTE: It is UNLAWFUL to channel water onto adjacent property.

Authority: Declaration, Paragraph 3.C.

Right-of-Way Reflectors

(KRMC-06)

Right-of-Way reflectors may be allowed seasonal (winter) or year-round if approved by the Kenmore Road Maintenance Committee (KRMC). All reflectors must adhere to the standards as indicated below.

Standards for Reflectors

- Reflectors must be red in color.
- Reflectors must be a maximum of 3 inches in diameter, including frame.
- Stem should be no higher than 18 inches above the ground or grass.
- Stem should be 3/16 inch in diameter, must be breakaway, not set in concrete, and without rock or wood posts for support.
- Reflectors should be set a minimum of 12 inches from the edge of the road and be spaced a minimum of 20 feet apart.

Seasonal Reflectors: Seasonal reflectors are allowed only during a limited period during the “winter season” to assist in marking the edge of the roadway to assist in snow removal. Specific timeframe/duration for the “winter season” allowed reflectors is announced each year by KRMC (Snowman).

Year-Round Reflectors: Normally, these reflectors are primarily used to highlight areas of driver concern and/or safety. Typical examples are driveway entrances, blind curves and hazardous roadway edges. Once approved by KRMC these reflectors are allowed on a semi-permanent basis. Property Owner(s) may be requested to remove the reflectors at any time if KPOA or KRMC deem the approved basis for the need for the reflectors no longer exists.

Property Owners will be requested to remove any non-approved year-round, out-of-season and/or non-standard reflectors. Non-compliance may result in a fine and/or sanction.

Winter Storm Management

(KRMC-07)

Purpose of Storm Management

During winter storm situations, Kenmure Road Maintenance and Kenmure Security will use a coordinated plan to:

- Allow Kenmure roads to be cleared in a timely fashion
- Maintain a safe driving environment
- Provide sufficient information in order for people to make well-reasoned decisions with regard to travel.

Snowman Responsibilities

During winter storms, the KRMC "Snowman," or his alternate, will be the decision-maker and leader of the response plan. His responsibilities include the following:

- Calling in and directing the plowing and sanding contractor
- Establishing the condition of roads within Kenmure and the level of response needed
- Communicating Kenmure road conditions to the guards at the front gate as well as residents

Notice of Road Conditions

In order to provide consistent reports, Kenmure Road Maintenance and Kenmure Security have defined the following road conditions:

GREEN	Normal road conditions. Drive with usual care.
YELLOW	All roads are wet, with potential for icing/slick conditions.
ORANGE	All roads snow or ice covered – slippery conditions in many locations. Impassable in spots.
RED	All roads are icy and slippery - very treacherous and impassable. ROADS ARE CLOSED!

A status indicator will be posted at the gate to alert returning residents of current road conditions. In addition, a message stating current road conditions will also be posted on the Kenmure Emergency Information Line (696-8805).

Kenmure Gate Responsibilities Related to Color Designations

When Status is "Yellow" – Property Owners, guests, and contractors will have normal gate access. If asked about road conditions by Property Owners, guests or contractors entering Kenmure, the guards will advise them of the following:

- Roads are wet with packed snow in many areas, but are passable
- Drive with care on snow-covered sections
- Be wary of scattered icy spots and falling temperatures that may cause icing
- Latest road status can be obtained by calling the Kenmure Emergency Information Line (696-8805)

When Status is "Orange" - Kenmure Security Guards will close the outer entry gate and direct all incoming traffic through the inner entry gate. Guards will call "Snowman" every two hours with report of abandoned cars and/or road conditions they have discovered either during routine patrol or by input from cars leaving Kenmure. As Property Owners, guests, or contractors enter, guards will advise them of the following:

- Snow is on all roads, icy conditions in many locations
- Roads are treacherous and impassible in spots, especially on steep grades
- It is recommended that drivers stay off the roads until conditions improve
- If drivers must enter, please proceed with extreme caution
- Latest road status can be obtained by calling the Kenmure Emergency Information Line (696-8805)

When Status is "Red" - Kenmure Security Guards will close the outer entry gate and direct all incoming traffic through the inner entry gate. Guards will turn away all nonresident/contractor/guest traffic except for emergency vehicles, snow removal contractor, and KCC staff. Guards will tell returning Property Owners that all roads are temporarily closed because they are icy, treacherous, and impassable. If returning residents insist on entering, guards will note their name, license tag, time of entry, and destination. The guards will then allow them to enter.

Winter Storm Emergency - If it is deemed a commPropertyty wide emergency declaration is needed the Gatehouse will give returning Property Owners a copy of the following "Kenmure Roads are Temporarily Closed" notification.

Kenmure Property Owners Association Winter Storm Emergency

KENMURE ROADS ARE TEMPORARILY CLOSED!

- ALL roads are icy and slippery.
- ALL roads are very treacherous and impassable.
- Returning residents are encouraged not to enter until conditions improve and snow removal is completed.
- Consider finding temporary shelter offsite.
- Latest road status can be obtained by calling the Kenmure Emergency Information Line at (696-8805).
- If you choose to enter, you do so at your own risk, as well as risk to others.
- Abandoned vehicles may hamper road-clearing efforts or impede first-responder emergency personnel.
- If your vehicle is abandoned and impedes snow removal or creates a safety concern, it will be towed away at your expense.

Authority: Declaration paragraph 18

Kenmure Roads and Traffic Safety

(KSC-01)

The motor vehicle laws of the State of North Carolina shall apply as rules and regulations with respect to roads and drivers within Kenmure. Under these laws all drivers in Kenmure including home owners, residents, guests, visitors, renters, contractors, subcontractors, service providers, Kenmure Country Club (KCC) employees (including Kenmure 11 LLC, Kenmure 12 LLC and Kemper), KCC members and guests are to be licensed. All vehicles operated in Kenmure are to be licensed and must have at least state-required minimum levels of insurance.

Only golf carts and golf course maintenance vehicles operated on the golf course and related facilities are exempt from State motor vehicle regulations. However, the operators of private golf carts and golf course maintenance vehicles must be at least 16 years of age and possess a valid driver's license. Such vehicles must give right of way to other regulated motorized vehicles operating on Kenmure roadways.

Moving Vehicles

Speed: The maximum speed limit on the roads within Kenmure is twenty-five (25) miles per hour (mph) or such lower speed when indicated by appropriate markers or as may be required for prudent driving, such as during adverse weather conditions. The maximum speed for golf carts is nineteen (19) mph. Golf cart suppliers can install a "speed control device" that automatically limits golf cart speed, even when descending hills.

Cell Phone Use: The use of a cell phone by drivers of motor vehicles is prohibited when the motor vehicle is in motion on Kenmure roadways

Repair: All vehicles shall slow in any area where construction, general maintenance, or utility personnel are working. Signals from flagmen must be obeyed at all times.

Side of the Road: All vehicles shall be operated on the right-hand side of the roads within Kenmure. Crossing of centerline is prohibited except when turning.

Passing Vehicles: Passing another moving vehicle in Kenmure is prohibited. Automobile drivers should take care when overtaking a golf cart on a Kenmure road. Whenever it is safe to do so, golf cart drivers are asked to pull off onto the shoulder and stop to let automobiles pass.

Violations: Any vehicle being operated in violation of any traffic law or KPOA Rule or Regulation is considered operated in a reckless manner. See appendix 1 for details on the Enforcement Process

Proper documentation of offenses is required in all instances, and fines to be imposed must be consistent with the KPOA Declarations, Bylaws, and Rules and Regulations.

Damage Responsibility: Drivers (residents, contractors, KEI staff, or visitors) are responsible for any damage done by their vehicles to roads, shoulders, signs, mailboxes, or resident's property.

Parking: Parking is not permitted on the roads within Kenmure. Parking in the right-of-way is permitted by a Property Owner only to the extent that parking in the Property Owner's driveway or ingress or egress to or from the Property Owner's garage or driveway is not a reasonable option because of work being done on the driveway or the driveway is blocked by vehicles parked in the driveway by contractors performing work at the Property Owner's property, but only for as long as the work is being done (including a reasonable period of time for driveway sealer to cure) or the vehicles are blocking the driveway. Parking in the right-of-way is permitted by short-term guests of a Property Owner only to the extent that (a) parking is not available in the Property Owner's

driveway and (b) the guest's vehicle remains in the right-of way for only a reasonable amount of time (based upon the reason for visiting the Property Owner), and in no event more than 24 hours. Construction activity may not block any road and may block the right-of-way for only as long as is necessary to complete the activity. In addition to the foregoing conditions, parking in the right-of-way will be permitted only if no portion of the parked vehicle is on the road or is obstructing or interfering with traffic on the road in any way (including obstructing or interfering with the ability of drivers to see other traffic or pedestrians).

Jobsite Parking: Contractors and subcontractors should park on the jobsite and not on the road or road shoulder. The Kenmure Road Maintenance Committee shall approve which side of the road shoulder may be used for overflow parking if it becomes necessary. Parking is not allowed on both shoulders of the road. Violations may be subject to enforcement action.

Activities Blocking the Road: If the loading/unloading or parking of trucks and trailers necessitates a blockage or partial blockage of a Kenmure roadway, the contractor, Property Owner or resident will be required to have persons (flagmen) in the roadway at a reasonable distance in front of and to the rear of the blockage to direct traffic during the entire time of the blockage. The driver should also place cones and warning signs an appropriate distance in front and behind the blockage to warn oncoming vehicles. Failure to do so can result in fines and/or restrictions on future work in Kenmure.

Private Golf Carts

Private golf carts may be driven on all Kenmure roads, maintained by Kenmure Property Owners Association, but must adhere to all the driving rules in Kenmure. A private golf cart may be driven on Kenmure Country Club property ONLY by a member of Kenmure Country Club. All owners of private golf carts must review and sign the "Golf Cart Rules and Safety Precautions" form which is available in the KPOA Office at 10 Kenmure Drive and on the KPOA website.

Motorcycles, ATVs, and Bicycles

Motorcycles-Motorcycles shall be licensed and equipped with the most recently approved noise control devices. All motorcycle drivers must operate according to the KPOA Motorcycle Rules below.

Motorcycle Use Permit-This permit is required for all residents and overnight guests and states the rules for the use of motorcycles within Kenmure. It must be signed and approved prior to the operation of the vehicle in Kenmure. This permit application form is available in the KPOA Office at 10 Kenmure Drive and at the Gatehouse. (See Appendix Attachment V)

This permit may be revoked at any time if any of the conditions below are violated or if the motorcycle is operated in an unsafe manner or in violation of any of the KPOA Covenants or Rules and Regulations.

Copies of the signed Motorcycle Permit shall be distributed to the motorcycle driver, the Kenmure Gatehouse and the KPOA Office. It is to be made available, upon request, to any KPOA security officer or Security Committee member.

Conditions governing motorcycle use

- The motorcycle is registered and licensed.
- The motorcycle may be operated only on designated roads between the gate and the applicant's home (or the residence being visited) and Kenmure facilities such as the golf course, tennis courts and fitness center. Use beyond these points is prohibited.
- The operator will make utmost effort to operate the motorcycle in a quiet manner.
- Residents must obtain a bar code sticker and overnight guests must obtain a guest pass to facilitate entry at the gate.

- Any visitor arriving on a motorcycle, after obtaining entry permission must travel to his/her final Kenmure destination directly and the visitor must conform to traffic and other rules and regulations in effect.

ATVs-All-terrain vehicles (ATV's), Segway-type vehicles, ***non-licensed*** motorized dirt bikes and mopeds, and small foot/motor propelled scooters are prohibited from use on Kenmure roads.

Bicycles-Bicycles shall be equipped with lights and the most recently approved safety devices. They may operate only on the roads and driveways in such manner as not to obstruct traffic.

Heavy Vehicles

Guards at the Gatehouse will determine when vehicle loads are potentially damaging to the roads or to the safety of others on the roads, such as when roads are icy or snow covered or when the vehicle load is deemed unsafe for some roads. Trucks or trailers may then be required to break down the cargo into smaller trucks if possible, to use restricted routes deemed suitable, or to wait until road conditions improve. Special restrictions governing the use of roads may be imposed when trucks are transporting large, heavy objects. Moving Van Rules (KSC-02) may also be applied.

Assumption of Risk

All persons using the roads in Kenmure do so at their own risk and are subject to the published rules and regulations and penalties levied for any violations. KPOA will not be responsible for delays, breakdowns, damage to personal property, personal injury, or death occurring on said roads. It should be clearly understood that the roads within Kenmure are private roads, owned and controlled by KPOA as common areas and as such are not necessarily built, nor maintained, to State public road standards.

Reporting Accidents and Violations

In the event of a vehicle accident, persons involved should notify Gatehouse Security immediately. Residents are encouraged to assist our Security Officers in monitoring the streets for traffic rules violators by reporting their observations to Security Officers. If persons observe unsafe driving behavior, they are asked to contact the Gatehouse and report the incident, including: date, time, place, vehicle description, description of the driver (to the extent possible), license tag number, and description of the unsafe driving observed. The security officers will log all such reports, and incident reports will be prepared for those incidents. Such complaints by residents will be issued to residents, guests and contractors along with a notification letter to the person. These complaints will not count as violations under the enforcement policy and are not subject to a fine being levied to the person. Only violations supported by objective information (for example, radar gun recorded speed violation) documented by security officers can be considered violations for which a resident, guest or contractor might be subject to a fine. In other words, traffic violations by anyone witnessed and documented by a KPOA Security Officer are subject to a fine. Contractors who exercise poor driving habits are also subject to restricted gate access.

Impaired Driving

Driving under the influence of alcohol or other drugs that impair the ability to control a vehicle in a safe manner will result in an unsafe driving incident report being filed. Law enforcement may be called if circumstances require. If persons observe unsafe driving behavior, they are asked to contact the Gatehouse and report the incident, including: date, time, place, vehicle description, description of the driver (to the extent possible), license tag number, and description of the unsafe driving observed. The guards will log all such reports, and incident reports will be prepared for those incidents.

Enforcement

Where warranted, the on-call KSC member or the KSC Chairman will be consulted regarding violations. KSC will review incident reports on a regular basis to determine if and what action is required.

Private Golf Cart Rules and Safety Precautions

KPOA Golf Cart Policy

Private golf carts may be driven on all Kenmure roads that are maintained by Kenmure Property Owners Association (KPOA), but **must** adhere to all the driving rules in Kenmure. You are permitted to drive your private golf cart on Kenmure Country Club (KCC) property ONLY if you are a Kenmure Country Club Member.

KPOA requires all owners of golf carts to adhere to the following:

1. Golf cart drivers must possess a government issued driver's license.
2. **Golf cart owner must show proof of insurance on the golf cart.**
3. The golf cart must be maintained in a safe and good working condition.
4. **Rearview mirror(s) are required for driving on Kenmure roads.**
5. Always yield to pedestrians and be cognizant of motor vehicles. If a car is approaching from behind, where possible, pull to the side (or right-of-way) and signal for them to pass.
6. To operate at night or before sunrise your golf cart must be equipped with head lights and brake lights. Headlights should be used 20 minutes before sunset and 20 minutes after sunrise.
7. Obey all vehicle traffic laws and rules of the road, including stop signs and lane assignments. Drive courteously and never drive recklessly.
8. Never drive intoxicated or under the influence of any drug.
9. Avoid distractions while operating the golf cart just as you would in an automobile. Be safe and attentive --avoid using the mobile phone (calls or texting), reading, reaching for objects, or attending to personal appearance.
10. Only carry the number of occupants for which the cart was designed.
11. Drivers and all passengers should keep all body parts (arms, legs, feet) inside cart while vehicle is in motion, except when signaling a turn.
12. Do not allow anyone to ride standing in the vehicle or on the back platform of the vehicle. Do not put vehicle in motion until all passengers are safely seated inside vehicle.
13. Operate the vehicle from the driver's side only.
14. If your cart does not have turn signals, then use hand signals to indicate your intent. You may also use hand signals due to the small size and limited visibility of the turn signals on a golf cart.
15. Check blind spots before turning. When making a left-hand turn, yield to the through traffic before turning left.
16. Carefully turn and look behind golf cart before backing up.
17. Avoid sharp turns at maximum speed and drive straight up and down slopes to reduce the risk of passenger ejections and/or rollover. Avoid excessive speed, sudden starts, stops and fast turns.
18. Reduce speed due to driving conditions, especially hills or other inclines or declines, blind corners, intersections, pedestrians and inclement weather.
19. Avoid (or drive slowly) on wet conditions, especially on wet leaves.
20. Make sure the parking brake is engaged when leaving the vehicle.
21. Use extreme caution in inclement weather. Although a golf cart may shield you from the rain, it may not protect you from lightning strikes.
22. Violations of the Golf Cart Policy and/or Kenmure Roads and Traffic Safety Policy (KSC-01) will be handled in the same manner as traffic violations following the guidelines of the KSC Moving Vehicle Violations Policy and the KPOA Enforcement Process.
23. Notify the KPOA Office (828-692-2346) if you sell your golf cart so that the identification decal can be cancelled or transferred to another Kenmure resident.

To obtain a “golf cart decal”, follow the steps below.

1. print out the **PRIVATE GOLF CART RULES and SAFETY PRECAUTIONS** form from the KPOA website.
2. Review the agreement.
3. After review; complete and sign this form, acknowledging acceptance of the terms.
4. Take the completed form to the KPOA office where a ‘golf cart decal’ will be issued.
5. The decal must be applied to the lower left part of the golf cart windshield.

Authority: Kenmore Declaration, paragraphs 18, 39

Moving Vans/Large Trucks

(KSC-02)

Purpose

It is recognized that Kenmure Property Owners and residents will, on occasion, require moving vans or other large trucks to deliver or collect household items from their residences. These guidelines are meant to provide advance notice to Property Owners/residents and their agents of the requirements for such large truck access. The objectives of these guidelines are to protect Kenmure roads from damage and to ensure traffic safety within Kenmure, while avoiding excessive cost and inconvenience to Property Owners. These general rules apply to large trucks and also cover trucks used for home construction. See KRMC-01 and KSC-01 for truck parking details.

Moving Van and Large Truck Requirements

Advance Notice

Advance notice to the Kenmure Gatehouse Security Site Supervisor or Senior Security Officer of any major move into or out of Kenmure is required. Notice should be given using the "Approval for Moving Van Access" form. Note: A Moving Van Access Form (Form NEH 10) will not be issued until Occupancy Permit has been issued by KARC (Occupancy Permit is not required for resale's). The Moving Van Access Form is available on the Kenmure web site at www.Kenmure.org, the Kenmure Gatehouse, or at the KPOA Office. This form should be submitted to the Gatehouse at least 72 hours before the intended delivery or pick-up. It is to be approved by the Kenmure Security Site Supervisor or Senior Security Officer on day shift from 7:00 am to 2:30 pm weekdays. Deliveries or pick-ups without pre-approval of the form above will not be allowed. In the event the Site Supervisor or Senior Security Officer is not available for approval, the form may be submitted to the Kenmure Security Committee member on call for approval.

Road Damage

The Property Owner is fully responsible for any damage done to Kenmure roads, rights-of way, common property, Kenmure Country Club property, or other resident's property during or as a result of the delivery or the pick-up.

Vehicle Size

Vehicles, including the length of any trailer/van, that is less than 35 feet long, will be permitted anywhere in Kenmure for moves of household goods or any other service, except on Tarnhill Drive, between Pineholt Lane and Tall Oak Lane. On Tarnhill Drive, vehicles are restricted to two axles and no trailers or pulled vans are allowed. Vehicles longer than 35 feet will often be permitted on Kenmure roads depending on the road needed for use, and access restrictions of the entrance to the residence, or lot. The size of the truck permitted on Kenmure roads will be determined by the Security Site Supervisor or Senior Security Officer. After discussing size with the Moving Company agent/driver or the driver for the construction/delivery company, and after safety considerations and a possible drive-through of the route are made, permission may or may not be granted for the trip.

Note: A Moving Van with a trailer length of 26 feet is close to 35 feet in total length, including the cab, so the Moving Van Access Form wording still applies.

Restricted Entry

In a discussion with the Security Site Supervisor or Senior Security Officer, the local agent or driver should determine whether the truck involved can reach the delivery address, park without impeding

traffic, and return to the gate without damaging Kenmure roads or rights-of-way, without excessively impeding traffic, and without endangering resident or traffic safety. If the agent and Security Site Supervisor or Senior Security Officer determine that delivery truck/moving van access to the delivery site cannot be achieved safely, then the delivery truck/moving van may be parked in the lower Kenmure Country Club parking lot, assuming that KCC agrees that its property is available for use and for parking and the Property Owner submits a check payable to KCC for \$500.00 for use of the parking lot. (KCC will issue a \$250 Food & Beverage Credit if the Property Owner joins KCC within 90 days of the move in date.) Smaller trucks are then used to shuttle the household goods to the Property Owner's location.

Cul-de-sac Delivery

For delivery to cul-de-sacs, large trucks should reverse down the cul-de-sac to the delivery location since the turnaround may not be large enough.

Pilot Vehicle Requirement

For large trucks that are going beyond the lower parking lot, where width and turn radius present a problem for vehicles coming in the opposite direction, but are still deemed to be safely passable on the roads to be used, a lead "pilot" vehicle must precede the truck to warn oncoming traffic and to ensure that the truck can make a wide turn to avoid road or right-of-way damage.

Blocking the Road

If during loading/unloading the van or truck blocks any part of a Kenmure roadway, the Property Owner, or the contractor will be required to hire two private flagmen to direct traffic for the entire time that the truck/van is blocking the road. The Property Owner or contractor must arrange in advance to hire and pay the flagmen. The driver should also place warning cones at appropriate distances in front of and behind the truck to warn oncoming traffic.

Hours for Deliveries and Pick-ups

Deliveries and pick-ups should be scheduled for Monday through Saturday. No Sunday or holiday deliveries or pick-ups are allowed. Additionally, on some days deliveries/pick-ups may be restricted if the lower Kenmure Country Club parking lot must be used because of scheduled Club events. Security Officers who approve moving forms will know, in advance, if a move is possible. If special hardship circumstances exist, the KSC member on call must be contacted in advance to determine if an exception will be made to the rules above, such as extending moves beyond normal work hours. Delivery can begin no earlier than 7:00 am Monday-Friday, and moves must be completed by 5:30 pm; on Saturday they must begin no earlier than 8:00 am and must be completed by 4:30 pm.

Real Estate, Estate/Garage Sale, and Political Signs

(KSC-03)

Kenmure Declaration, Paragraph 25

No signs, including "for rent," "for sale," and other similar signs shall be erected, placed, allowed, or maintained on any Property by anyone, including but not limited to a Property Owner, a Realtor, a contractor, or a subcontractor, except as provided in Section 47F-3-121(2) of the *North Carolina Planned CommPropertyty Act* or with the written approval of KPOA or as may be required by legal proceedings. If such approval is granted, KPOA reserves the right to restrict size, color, and content of such signs.

Real Estate Open Houses

Kenmure is a residential commPropertyty, and the sale of new or existing residences via real estate Open Houses will be permitted and shall not be considered a commercial undertaking as prohibited in the covenants. Real estate Open Houses, however, shall conform to the following regulations:

- A realtor will register an Open House with a KPOA Security Officer at the Gatehouse at least two days prior to the event.
- Public Open House activities (public is welcome) will be limited to Wednesday and Sunday afternoons between the hours of 1:00 pm and 5:00 pm. Realtors may also hold Listing Preview Open House events (only Realtors are invited) any weekday (Monday through Friday) between 11:00 am and 6:00 pm.
- Realtors must abide by the KPOA Declaration of Restrictive Covenants, Paragraph 25, regarding the prohibition of all signs with the exception of directional signs to the Open House inside the commPropertyty, not to exceed 24" x 18," during the hours of the event. Tent signs may be placed at the outside entrance to Kenmure, but shall not restrict visibility of drivers exiting Kenmure. All signs must be removed when the Open House activity ceases for the day.
- Individuals attending the Open House shall follow the normal visitor access procedures and policies of Kenmure.
- Abuse or noncompliance with these rules by the Realtor may result in limiting or denying future Open House activities in Kenmure.

Estate & Garage Sales

It is recognized that Kenmure has a large number of residents who will experience a lifechanging event while living in the commPropertyty, thus, they may choose to reduce their ownership of personal property through an estatesale. An estate sale, in order not to be considered a commercial activity, must conform to the following regulations:

- The resident or agent must register the planned sale activity with the KSC for review and approval at least five business days prior to the event.
- Only one estate sale, covering not more than two consecutive days, will be permitted at the same street address in any 12-month period. Only one estate sale within Kenmure will be permitted each day.
- The sales activity will be "by appointment only." The names of the appointment holders shall be provided to KSC and guards at the Kenmure Gatehouse by 9:00 am of the day of the event. Only those individuals whose names have been provided will be admitted into Kenmure. Individuals attending the estate sale shall follow all visitor regulations.
- Vehicles must be parked on the driveway of that residence; parking on the shoulder of the road or any road right-of-way is prohibited.
- Estate sale activity shall be limited to the hours of 10:00 am through 5:00 pm on Monday through Saturday.

- At no time will items be displayed from an open garage, adjacent lawn or property, or from any portion of the property visible from the street.
- Buyers returning to pick up items purchased in an Estate Sale on a different date than the sale will need to be entered in the Visitors gate pass system for access to Kenmure. Vehicles used to pick-up the goods must comply with the standard size limitations for Kenmure as documented in KSC-02.
- Garage sales are not permitted within Kenmure. Garage sales are considered to be a "not-by appointment" sales activity conducted by a resident or his agent.

Political Signs

As defined by the *North Carolina Planned CommProperty Act*, 47F-3-121(2), a "political sign" means a sign that attempts to influence the outcome of an election, including supporting or opposing an issue on the election ballot.

In accordance with the *North Carolina Planned CommProperty Act*, 47F-3-121(2), political signs are permitted on a property owned exclusively by an association member. Political signs are not permitted in common areas, easements, rights-of-way, or other areas owned by others.

KPOA adopts the *North Carolina Planned CommProperty Act's* duration, number and size limitations on political signs.

Duration: KPOA prohibits display of political signs earlier than 45 days before the day of the election and later than seven days after an election day.

Number and Size: KPOA permits one political sign with the maximum dimensions of 24 inches by 24 inches on a member's property.

If Henderson County or the Village of Flat Rock regulates the size and number of political signs on residential property, KPOA adopts by reference that ordinance, if that ordinance is less restrictive than this KPOA Rule.

Authority: Declaration paragraph 25; North Carolina Planned CommProperty Act, 47F-3-121(2)

Gate Access

(KSC-04)

To help maintain Kenmure as a safe community, KPOA has adopted the following gate access policy.

Property Owners, Renters, KCC members, KCC employees

Bar Code Requirement: All Property Owners are to use bar code decals on their vehicles to gain gate access. Bar code stickers may be obtained from the KPOA Office by submitting a completed "Request for Bar Code Decal" form along with the appropriate fee. The form is available from the KPOA website at <https://kenmure.org/new-resident/>, KPOA Office or the Kenmure Sales Office. The applicable fee for each bar code decal is indicated on the form. If a Property Owner disposes of an existing vehicle, the decal number should be reported to the KPOA Office for deactivation. There is no charge for a new bar code sticker, unless the vehicle purchased or leased is an additional vehicle rather than a replacement.

Proof of Vehicle Ownership: Owners and lessors of vehicles must present proof of ownership or lease of the vehicle when requesting a new or replacement bar code. Proof of ownership or lease can be the vehicle registration card, bill of sale or proof of insurance. In addition, the license plate number, year, make, model, and color of the vehicle must be supplied.

Problems with Bar Codes: Gatehouse security officers are instructed to grant access only to vehicles with a functioning bar code decal. If a bar code decal fails to work, the Security Officer will request the driver contact the KPOA Office and determine the nature of the problem after recording the driver's name and license plate number for cross checking in the "gate access software system". Vehicles without working bar codes should not be waved through the gate. Residents whose bar codes repeatedly malfunction after discussing with the KPOA Office will be referred to the Chairman of the KSC for regulation enforcement discussions. If a vehicle without a bar code decal approaches the outer/resident entry gate, the guard will request the vehicle enter through the inner gate. Manual operation of the outer entry gate is limited to emergency situations and large trucks.

Non-Property Owner Issued Bar Code Decals:

Renters who have leases of two weeks or more may obtain bar codes for up to two vehicles registered to them. If a renter is a repeat renter each year, the bar codes may be reactivated each year at no charge.

Non-resident Kenmure Country Club Members may purchase no more than two bar codes. Kenmure residents who subsequently move to Berwick Downs will have their bar codes deactivated unless they are KCC members.

Kenmure Country Club Employees. Selected employees may be issued bar codes based on their job responsibilities. Kenmure Country Club will be invoiced for those approved employees.

Others. It is possible that other categories of drivers may be issued bar codes in addition to the above. These categories will be decided by the KSC with KPOA Board approval.

Gate Access for Visitors

New Home Contractors: All contractors are to sign in at the Gatehouse, provide photo identification if requested and obtain a temporary pass. Temporary passes for sub-contractors may be issued for up to one month for regular contractors and subcontractors. The temporary passes are to be returned to the Gatehouse upon exiting Kenmure, or when the pass expires.

Remodeling Contractors & Service Providers: These companies/individuals will only be given access to Kenmure if the Property Owner has entered them into the "gate access software system" and must provide photo identification if requested.

It is **highly recommended by KPOA** that all contractors and service providers apply to the Kenmure

Security Committee for an annual gate pass. Annual access passes are granted on the condition that all current KPOA Rules and Regulations are followed. Those holding an annual gate pass will be reviewed for compliance by the Kenmure Security Committee every January.

Visitors: All others wishing to obtain access to Kenmure and who do not have bar code decals will be considered a visitor and must sign in at the Gatehouse, provide photo identification if requested and follow the established security procedures for Kenmure visitors. Property Owners, Kenmure Country Club, Kenmure Sales Office and renters must pre-register guests for admittance into Kenmure by entering them into the “gate access software system”. If a visitor arrives that has not been entered in the “gate access software system” they will not be allowed entry to Kenmure.

An exception to the above process are visitors arriving who want to meet with the Kenmure Sales Office staff but are not listed in the “gate access software system”. In this case the Gatehouse staff will contact the Kenmure Sales Office for approval to allow the visitors to entry Kenmure.

Those wishing to allow certain family members, friends, or regular service employees to pass through the Gate House to visit them at any time must enter this information into the “gate access software system”. They should indicate how long the individual(s) have permission to enter up to the maximum of 1 (one) calendar year. Gate House staff will provide a printed pass that must be displayed in the windshield; otherwise, a new pass must be obtained.

Gate Access in the Event of Guardianship or Death of Property Owner

If Property Owner is an individual: The individual's children will be presumed to have access to the Property Owner's property after providing photo identification if requested. Upon appointment, court-approved representatives of the estate or a guardian will be granted gate access after providing documentation, and can authorize access for visitors and contractors using the “gate access software system”.

If the Property Owner is a trust: Trustee or beneficiary will be presumed to have access to the Property Owner's property upon presenting legal documentation.

As applicable, children of a Property Owner, court-approved estate representatives, guardians, trustees, or trust beneficiaries should contact the KPOA Office for a bar code or a temporary vehicle pass as well as access to the “gate access software system”.

Authority: Declaration Paragraphs 3.D. and 18

Contractor Work Hours

(KSC-05)

Definition: Contractors are individuals who do work under written or verbal contracts with KPOA, Property Owners or KCC management. They are either individuals who perform work related to new home construction or major home renovation and fall under KARC oversight authority, or they are individuals who perform lawn maintenance, delivery service, utility operators, or resident requested services. The first category will be referred to as "KARC contractors," and the others as "delivery/service/utility operators." Refer to KSC-01 "Enforcement".

Normal Work Hours

KARC contractors and delivery/service/utility operators in Kenmure are allowed to work Monday through Friday from 7:00 am to 5:00 pm and **must** be off property by 5:30 pm. Saturday work is permitted from 8:00 am to 4:00 pm, provided the contractor complies with the Saturday Work Rules, below. On Saturdays Contractors must be off property by 4:30 pm. No trucks, trailers or other vehicles with tandem (double rear) axles will be allowed to enter any Kenmure gate or operate on Kenmure roads after normal work hours or on weekends. Exceptions include vehicles seeking entry to perform KPOA contracted work or extenuating circumstances (emergencies) and ONLY after a KSC member on call is advised and has given permission. Moving vans may also be allowed on Saturdays after approval by the Security Site Supervisor or KSC Member on call.

Extended Work Hours

Work, and deliveries, on weekdays before 7:00 am or after 5:30 pm or on Saturday before 8:00 am or after 4:30 pm require special approval by the KSC member on call. Permission will be given only in unusual or "hardship" situations and only for specified and limited work hours. The length of the extension, name of the KSC member who approved the extension and the reason for the extension must be entered in the Security Staff's daily log for record purposes. Contractors wishing to work after normal hours must contact the Gatehouse Security Officer to request approval. Security officers will contact the KSC on-call member to obtain approval or disapproval.

Saturday Work Rules

No outside noise-making activity by any contractor will be permitted on Saturdays with the exception of normal lawn mowing and blower clean-up which is restricted to the hours of 8:00 am and 12:00 noon. Landscape work not involving power equipment is permitted 8:00 am to 4:30 pm. Indoors contractor work is allowed as long as the noise level does not impact nearby residents. Examples of non-permitted activities include, but are not limited to: lot clearing, stump or tree removal, use of chain saws or chippers, nailing with a pneumatic or cartridge nail gun, installation of siding, roofing or decking, power washing or other use of compressors, and resurfacing of driveways.

Sunday and Holiday Work

No work is permitted on Sunday or holidays, Holidays include Memorial Day, July 4, Labor Day, Thanksgiving Day, Christmas Day, and New Year's Day. Exceptions include vehicles seeking entry to perform KPOA contracted work or extenuating/emergency circumstances and ONLY after a KSC member on call is advised and give permission. Moving vans are not allowed on Sundays.

Special Allowed Work/Deliveries

Between the hours of 10:00 pm and 7:00 am package deliveries, non-urgent medical services, emergency services/deliveries (HVAC, etc.), and convenience deliveries (fast food, etc.) will only be admitted to Kenmure

if the Security Gate House is informed in advance by resident needing the service and/or delivery.

Exceptions to Saturday and Sunday Work

Residential emergencies such as plumbing and HVAC problems, electrical/internet/cable outages, and roof leaks will normally be granted exceptions. Hardship situations will be considered on a case-by-case basis by the KSC member on call.

Enforcement Procedures

After 5:30 pm weekdays and after 4:30 pm Saturdays, Security officers will monitor the exit gate to ensure that all KARC contractors and delivery/service/utility operators have left Kenmore. Security officers will also conduct a drive-by of construction sites between 5:00 pm and 6:00 pm on weekdays and 4:00 pm and 5:00 pm on Saturdays to ensure work has ceased at these sites.

If any contractor leaves Kenmore after normal hours, Kenmore Security Officers will deliver a verbal reminder concerning the rules to the offender; obtain the individual's name, the name of the contractor, vehicle license number, and Property Owner/name/address where the work was being done. This information will be logged into the security record and the violator's supervisor, where applicable, will be advised of the rule's violation. The violation will also be reported to KSC. If the individual is a KARC contractor or sub, the general contractor and KARC contact will also be notified of the violation by the Security officers.

Delivery/service/utility operators who violate these work rules a third time may be denied access to Kenmore for a period of time by the Security Committee, if approved by the KPOA Board. If repeated violations occur and KARC contractors or the sub-contractors of their suppliers for a new home are responsible, the Security Site Supervisor will contact KARC, who may then elect to take action against the contractor/Property Owner through a reduction of the refundable building deposit. KARC will take the lead on enforcement action against general contractors and their employees, rather than the KSC.

The general contractor is responsible for employees, subcontractors, and all persons who supply material and labor for the fulfillment of the general contractor's contract observing Saturday work rules. Any failure to comply by employees, subcontractors, and/or material and labor suppliers can be charged against the general contractor. Any failure to comply by an employee of a sub-contractor or by an employee of a material and labor supplier can also be charged against the employer of that employee. The ultimate responsibility remains with the Property Owner.

Fireworks, Fires, and Devices Using Fire

(KSC-06)

Purpose: Fire is the **single largest threat** to the Kenmore community as a whole, and prevention of fire is a major concern for all Property Owners. **Property Owners and KPOA insurance requirements may also be integral to this Rule.**

Approval and Enforcement: KARC is charged with all Approvals and KSC is charged with all enforcement of this Rule.

Rule

Use of fireworks or similar incendiary devices, setting of bonfires, or conducting outdoor burning is prohibited at all times.

Use of an open fire pit device on a deck or yard is prohibited except as follows:

1. Fire pits that are fueled by either propane or natural gas may be installed on **non-covered** decks or patios **contiguous to the residence**, provided that they are not subject to any overhang of trees or shrubs within 10 feet of such installation, or such that falling leaves or debris might land on such operating fire pit and cause hot fly ash dispersion;
2. Such Fire pits may be installed on covered decks or patios contiguous to the residence, provided that any overhanging roof is higher than 10 feet above such installation;
3. Fire pits must have a screen cover, a manual cut off valve, and an automatic timer switch installed on the incoming gas line in order to assure fuel cut off after a prescribed time as set by the owner; and
4. All fire pit devices must otherwise conform to the North Carolina Residential Code, the North Carolina Fire Code, and the North Carolina Fuel Gas Code and shall be installed per manufacturer's instructions. The URL link to the applicable codes is at the end of this rule for owners use.

Fireplaces and grills **without chimney** may be installed on **non-covered** decks or patios according to applicable North Carolina Codes and Manufacturer's Specifications. Fireplaces and grills **with chimney** may be installed on **covered** decks or patios according to applicable North Carolina Codes and Manufacturer's Specifications. All fireplaces must have a screen installed during operation. Residents of condos may be subject to prohibition or additional restraints based on North Carolina Codes or Condo Association rules. Consult with the Condo Association for their current rules.

It is the responsibility of the Property Owner to insure compliance with all applicable North Carolina Codes and manufacturer's specifications.

KARC form NEH8 located on the KPOA website must be approved by KARC prior to any construction/installation of **fire pit** devices. This Form is to be used for New Home, Additional, or Modified construction. Condo and Cottage owners must get their Association's approval for the installation before submitting the document to KARC for final approval.

Violators may be subject to fines in accordance with Section 11.3 of the KPOA Bylaws.

Argyle Lane Gate Access (KSC-07)

Purpose of Gate

The purpose of the Argyle Lane Gate is to provide the following benefits to residents of Kenmure:

1. Provides an emergency exit in case of certain fire, flooding, or other conditions that may require leaving Kenmure on an emergency basis.
2. Provides faster response times by Emergency vehicles such as fire, law enforcement, or medical response teams, especially to the area south of Pinnacle Mountain Road.
3. Provides general entry/exit to/from Kenmure.
4. As an alternate to the main gate on Kenmure Drive, reduces wear and tear on Kenmure Drive, Elmridge Drive, Berry Creek Drive, and portions of Pinnacle Peak Lane by requiring certain vehicles that are headed to or leaving the area south of Pinnacle Mountain Road to use Argyle Lane Gate.

Note: During extreme weather conditions (Code Red and/or Orange), the Kenmure Security Officers may close the gate and place orange cones in the roadway at Hollybrook Drive to indicate the gate is closed to all uses.

Characteristics of the Gate

The Argyle Lane Gate is equipped with automatic cross-arms, signage, lighting, and cameras so that the Kenmure Security Officers may monitor the gate 24/7 from the Main Gate House at the Kenmure Drive entrance (the "Main Gate"). The cameras record all vehicles entering and leaving Kenmure, specifically capturing the license plates of each vehicle and recording this on a long-term DVR recorder. There is also a camera and a keypad and communications system at the ingress side of the gate arms that can be used for communication with the Main Gate House.

Resident Hours and Instructions

Residents may use the Argyle Lane Gate 24/7 unless temporarily closed for weather-related conditions. If there is any doubt, the Main Gate should be used. Egress from Hollybrook Drive is automatic and ingress from Pinnacle Mountain Road may be made by communicating with the Main Gate House and providing proper identification, such as name, address, phone number(s), and/or email address. There is an instruction panel just above the keypad, and those requesting entrance should press **001** on the keypad to call the Main Gate House. Once entry is approved, the Security Officer will open the gate.

Guests of Residents or KCC

Except as required below in the immediately following section, all non-residents, including guests of Kenmure residents and the Kenmure Country Club, must use the Main Gate.

Vehicles Required to Use Argyle Lane Gate

Anyone driving a Restricted Vehicle, for ingress and for egress, that is transporting people, equipment, supplies, or building materials to or from any construction site on a Designated Street must use the Argyle Lane Gate. A Restricted Vehicle is any construction, delivery, or other vehicle that is not classified as Class 1 through Class 3 by the USDOT Truck Classification system. KSC 07-A sets forth the requirements and enforcement provisions associated with such construction-related use.

Adopted by the KPOA Board of Directors on March 3, 2012

Revised and Approved by the KPOA Board of Directors – February 25, 2022

Authority: Declaration, Paragraph 18

Argyle Lane Gate Access

(KSC-07A)

This Rule is a supplement to KSC-07. It relates to the use of the Argyle Lane Gate by all drivers of inbound and outbound vehicles associated with construction projects in Kenmure.

Purpose of Gate

The purpose of this Rule is to reduce wear and tear on Kenmure Drive, Elmridge Drive, Berry Creek Drive, and portions of Pinnacle Peak Lane by requiring certain vehicles that are headed to or leaving any construction site in the area south of Pinnacle Mountain Road to use Argyle Lane Gate.

Characteristics of the Gate

The Argyle Lane Gate is equipped with automatic cross-arms, signage, lighting, and cameras so that the Kenmure Security Officers may monitor the gate 24/7 from the Main Gate House at the Kenmure Drive entrance (the "Main Gate"). The cameras record all vehicles entering and leaving Kenmure, specifically capturing the license plates of each vehicle and recording this on a long-term DVR recorder. There is also a camera and a keypad and communications system at the ingress side of the gate arms that can be used for communication with the Main Gate House.

Vehicles Required to Use Argyle Lane Gate

The Argyle Lane Gate must be used by anyone driving a Restricted Vehicle, for ingress and for egress, if it is transporting people, equipment, supplies, or building materials to or from any construction site on a Designated Street. A Restricted Vehicle is any construction, delivery, or other vehicle ***that is not classified as Class 1 through Class 3 by the USDOT Truck Classification system.*** Contractors and their subcontractors using any vehicles other than Restricted Vehicles are encouraged to use the Argyle Lane Gate as well. Designated Streets are as follows:

Brookhaven Court	Edgehurst Court	Manorwood Court
Chancery Court	Fernridge Court	Minthill Court
Chatsworth Court	Green Meadow Court	Mossridge Court
Cottonwood Court	Haverhill Court	Pinnacle Peak Lane
Creeksedge Court	Hollybrook Drive	Stonecrest Court
Dartmoor Court	Huntmere Court	

Each general contractor is responsible for compliance with this requirement by all sub-contractors and crews. For Contractor Work Hours, see KPOA Rule KSC 05.

Enforcement

It is a violation for anyone to attempt to access Kenmure via the Main Gate if that individual is driving a Restricted Vehicle that is required to use the Argyle Lane Gate. The individual will be notified of the violation and will be directed to the Argyle Lane Gate. The first violation will result in a verbal or written warning. Second and subsequent violations will result in fines in the amount of \$100 per violation.

Fines will be collected by deducting the total amount from the Adherence to Policy portion of the Refundable Construction Deposit. See form NH 5.

Adopted by the KPOA Board of Directors on February 25, 2022

Authority: Declaration, Paragraph 18

Trash & Recyclables Collection

(KSC -08)

KPOA has contracted with Maybin's Services for trash and recyclables collection. Cost is included in all resident and lot owners' annual assessments. Residents must place trash and recyclables at the roadside in front of their home, at one location only per household on Monday mornings (unless there is a holiday, which are noted on the back of the Kenmure directory). Residents must return empty trash bins to their residence later the same day of trash pick-up. (See **note** at end of this section regarding how to handle/report trash pickup problems). During the winter, Maybin's will begin trash pickup at 8:00 am and during the summer, (Memorial Day to Labor Day) they will begin trash pickup at 7:00 am. Reminders regarding the change of trash pick-up hours will be sent via KPOA email.

Approved Waste: Large garbage bags and any bags with non-recyclable trash must be placed in secure plastic or metal containers to reduce the opportunity for animals to scatter the contents. Should trash become scattered due to animals accessing trash, Maybin's personnel are not responsible for cleaning up such messes.

Loose trash is not allowed. All trash must always be bagged, even when placed inside a plastic or metal trash container. Non-recyclable trash bags may be any color except blue. Maybin's will pick up ordinary household waste and small items if it measures no more than 2 feet x 1.5 feet x 2 feet. A standard weekly pick-up for household waste should **not** exceed the equivalent of five 30-gallon trash bags or twelve 13-gallon trash bags.

Maybin's Provided Trash Bins: Maybin's provides Kenmure residents one 96-gallon trash bin at no charge, which is delivered to the homeowner at no cost. Each resident can have no more than one Maybin's provided 96-gallon trash bin. Any resident interested in receiving that trash bin should contact Maybin's directly by calling their office during normal business hours at (828) 692-9872 to make arrangements for them to deliver the trash bin.

Recyclables: Recyclables must be put in blue plastic bags and should be placed separately, adjacent to the plastic or metal trash containers at the street. Blue recycling bags may be placed inside blue labeled recycle containers. **Blue recycle bags should never be placed inside trash and garbage containers.** See the recycle requirements in the next section for additional information regarding what can and can't be recycled, as well as limitations on cardboard material.

Special and Excluded Material Pick-Up: The term "Special Materials" includes bulky items and other special wastes that cannot be placed in a residential trash bag or trash can, and that cannot be picked up by the regular garbage collection vehicle. Included are: appliances larger than a microwave oven, furniture larger than a table measuring 2 feet x 1.5 feet x 2 feet high, building materials, demolition debris, bulky cartons not broken down, a higher-than-normal weekly volume of household trash, garbage that might be associated with spring cleaning, new resident "move-in," holidays and/or other personal events. Additionally, this includes other solid or liquid wastes that are not acceptable in landfills because of governmental regulations. Within these size and volume guidelines, the waste products must be of reasonable weight that can safely be lifted by Maybin's personnel.

If a pick-up for excluded materials is desired (except for yard waste and waste not acceptable because of governmental regulations), Maybin's must be contacted directly by calling their office during normal business hours at (828) 692-9872, to arrange for a private pickup at the resident's expense. Any arrangements made directly with Maybin's for them to do a pick-up of special materials, those items must be put out at the curb on the morning of the same day of the scheduled pick-up only. Residents are encouraged to hold

construction/remodeling contractors responsible for hauling away construction debris, since Maybin's may not be willing to provide a private pickup for such material. Maybin's prices for private pickup will vary depending on factors such as the nature of the item(s) and volume.

Hazardous materials: Flammable items including, but not limited to antifreeze, motor oil, hydraulic fluid, gasoline and kerosene will not be accepted by Maybin's for trash pick-up. In addition, chemicals, pesticides, insecticides, fire extinguishers and items filled with compressed air will also not be accepted for pick-up either. However, paint may be accepted if the paint cans are filled with equal quantities of paint and kitty litter (not sand) and then allowed to sit for a day or more to solidify the contents. The paint cans should then be put out separately, but next to the trash, and/or recyclables and should not be placed in any bags. The paint cans with the kitty litter inside of them must be clearly visible and noticeable as stand-alone items. For more information on hazardous waste disposal, contact the Henderson County Solid Waste Department at (828) 697-4505

Yard Waste: Maybin's does not pick-up yard waste. However, landscape companies on the Kenmure Security Approved Gate Entry Contractor List will pick-up yard waste. That list can be found on the KPOA website, in the Security Committee (KSC) section. Contact those landscape companies directly regarding their fees and to schedule a pick-up.

Holidays: Maybin's observes holidays consistent with the Henderson County Transfer Station. Holidays currently observed which are pertinent to Kenmure and Monday trash pick-ups are: New Year's Day, Martin Luther King Jr. Day, Memorial Day, Independence Day, Labor Day, Veteran's Day, Thanksgiving Day and Christmas Day. When these holidays occur on or are observed on Monday, trash should be put out Tuesday morning (not on Monday morning or evening). Trash holidays are listed on the back cover of the Kenmure directory.

Christmas Trees Pick-Up: "Live" Christmas trees will be collected in early January of each year, exact dates will be announced via email. Trees must not exceed six feet. Trees taller than 6 feet need to be cut into shorter sections, each not to exceed six feet in length. Trees must be stripped of lights and decorations and placed at roadside and away from any greenery, so that they are easily visible and distinguishable from other landscaping. Artificial trees are not included in this program.

Trash Problems: Residents are responsible for reporting trash handling problems directly to Maybin's by calling their office during normal business hours at (828) 692-9872. Such problems would include things like missed pickups, lawn damage, garbage spills, etc. By contacting Maybin's directly, the problem will be addressed more quickly. If the problem is then not resolved, the next step would be to contact the KPOA Security Committee volunteer serving as the Trash Liaison. That information can be found in the back of the Kenmure directory each year.

KPOA RECYCLING REQUIREMENTS

Place recycled materials in blue plastic bags and/or blue labeled recycling containers. Recycled material placed in other containers, even grocery bags or paper bags, will be treated as garbage and not recycled. **Blue recycle bags should never be placed inside trash and garbage containers as they will be treated as trash.**

WHAT CAN BE RECYCLED:

- Metal cans (no lids), aluminum, steel, tin
- Plastic bottles, jars and food containers #1 through #7
 - Exception: No styrofoam or black microwavable trays
- Glass bottles and jars: clear, brown, green
- Aluminum pie tins and food trays
- Milk and juice jugs
- Juice boxes
- Mixed paper:
 - Catalogs, junk mail, magazines, egg cartons (except styrofoam), envelopes
 - Manila envelopes, office paper, phone books, glossy paper
 - Post-It notes, cereal boxes, brown paper bags
- Items that are not required to be placed in blue bags:
 - Newspapers and inserts in securely tied bundles. Note: this material can also be placed loose (unbundled) in blue bags, but ensure that they are secured so that they don't blow around on windy days.
 - Flattened cardboard boxes without plastic or wax coating or soiled by garbage, i.e. pizza boxes
 - **NOTE: Excessive volumes of cardboard such as that associated with move-ins, holidays (especially Christmas), etc. cannot be picked up by Maybin's during routine weekly pickups.** Options for such excessive cardboard are to; take the material to the landfill, contact Maybin's for a private pickup or to put the material out at the curb in smaller batches over the course of several weeks.
 - Florescent tubes and compact florescent lights (possible mercury source): place in a separate container, label them, and set out separately from other trash/recyclables.

PREPARING RECYCLABLES:

- Rinse all bottles and cans, and remove lids
- Flatten plastic jugs and bottles
- Break down and flatten corrugated cardboard, and ensure that they are secured so that they don't blow around on windy days

WHAT IS NOT RECYCLABLE:

- Aerosol cans
- Batteries
- Aluminum foil
- Black microwavable trays
- Dishes or cookware
- Drinking glasses
- Light bulbs
- Paper towels or tissue
- Shredded paper
- Styrofoam
- Window and/or mirror glass

Revised and Updated by KPOA Security Committee – March 29, 2024

Approved by the KPOA Board of Directors – April 22, 2024

Authority: Declaration, Paragraph 3.C.

Pet Policies

No animal, livestock, or poultry of any kind shall be raised, bred or kept on any Property, except dogs, cats or other commonly domesticated household pets provided that they are not bred or maintained for commercial purposes. Pets will not be permitted if they constitute a nuisance such as consistent barking, aggressive behavior, intrusion on neighbor's property.

At all times when outside the owner's property all permissible pets must be constrained by a hand-held physical leash. Owners are also required to immediately cleanup after their pets when outside of their property.

Adopted by the KPOA Board of Directors, May 17, 2024

Authority: Declaration, Paragraph 5

Grounds Maintenance Upkeep

(GN-01)

Rights-of-Way

The right-of-way for the road system in Kenmore is generally 10 feet from the edge of the pavement. KPOA owns or controls all rights-of-way on roads that the KRMC has accepted for maintenance. KRMC has the responsibility for maintenance of those rights-of-way subject to the following exceptions:

Mowing: Grass on the shoulders will be mowed, in general, to a width of 6 to 8 feet from the edge of the pavement.

Improvements: Property Owners may make approved improvements in the right-of-way. KRMC must approve all improvements made in the right-of-way prior to the commencement of any work. Once improved, it is the responsibility of the Property Owner to maintain those improvements except for damage done by KPOA during maintenance.

Unimproved Residential Lots

Unimproved Residential Lots are those which have been platted and for which neither KRMC nor KARC have approved any building or other plan. Property Owners may do routine maintenance on unimproved Residential Lots including mowing, light trimming, and removal of dead vegetation. Please see previous sections for information relating to tree and landscaping work requiring KRMC or KARC approval. For example, under brushing of an area exceeding 250 square feet requires KARC approval.

The unapproved removal of trees is in violation of the tree policy. The piling of debris is not permitted. Such activity is subject to correction by the Residential Property Owner and/or fine if not rectified within a reasonable time.

Proposed Improved Residential Lots

A proposed improved Residential Lot is one that has had a proposed plan submitted to and approved by KARC and KRMC. While generally a precursor to the building process, a lot may also be deemed a proposed improved Residential Lot if the owner receives permission to make certain improvements to the Residential Lot, such as installing a drive for the purpose of maintaining the lot, or making improvements on the right-of-way. Once an approved plan has been executed, the Residential Property Owner must maintain the improved portion of the Residential Lot to acceptable standards unless the owner receives approval of KARC for a revised landscaping plan.

A Residential Lot may be partially improved with the balance of the Residential Lot left in a natural state. A Residential Lot or portion of a Residential Lot left in a natural state is not deemed to be in violation of the covenants; however, the improved portion of the Residential Lot must be acceptably maintained.

Noxious Weeds

Property Owners must ensure that noxious weeds, those covered by Federal and State noxious weed laws and those deemed a local problem, are not allowed to encroach onto adjacent properties. KPOA reserves the right to implement control, at the expense of Property Owner, of such weeds if Property Owners do not take adequate control measures to prevent encroachment. Local weeds deemed as problems include but are not necessarily limited to kudzu, poison ivy, Chinese Sumac ("Tree of Heaven"), poison oak, and poison sumac. *(The latter two are generally not found in this area.)*

Fire Hazards Under Extremely Dry Conditions

KPOA may, from time to time when conditions are extremely dry, require owners to implement vegetative control practices and other programs designed to protect property from becoming a fire hazard. The Property Owner is responsible for such maintenance, but KPOA may decide that action is needed and has the right to enter vacant lots to perform such maintenance; lots owners will be charged for the same.

Revised and Approved by KPOA Board of Directors – October 28, 2025

Authority: Declaration, Paragraphs 21, 22, and 24

Property Combination, Subdivision, or Boundary Relocation

(GN-02)

A Property combination, subdivision, or boundary line relocation can be authorized with the prior written approval of KPOA under the authority of the Third Amended and Restated Declaration of Restrictive Covenants, Paragraph 5 (Propertys were referred to as "lots" under previous declarations and rules). Should a Property Owner (excluding Developer as set forth in the Third Amended and Restated Declaration) wish to combine or subdivide two adjacent Propertys, a written application must be submitted to the KPOA Board for approval. Once approved, before two Propertys may be combined, the Property Owner must pay KPOA six times the then applicable annual assessment for an unimproved Property. No fee is required for a Property subdivision or boundary relocation. After KPOA approval, the payment of any fee, and the filing of a new deed with Henderson County, the Property Owner will be responsible for future annual assessments on any Propertys in place after the combination or subdivision.

The above rule replaces previous versions of GN-02.

Adopted by the KPOA Board of Directors, August 27, 2014

Authority: Declaration, Paragraph 5

Appendix I – Enforcement Process

ENFORCEMENT OVERVIEW

Kenmure Property Owners Association (KPOA) is staffed and managed by property-owner volunteers. KPOA does not have traditional police functions or powers. The Association is, however, responsible to follow-up on complaints and reported violations. Purpose of the Enforcement Procedure is to provide the KPOA Board and its Committees guidance in the timely and consistent handling of complaints or reported violations of the KPOA Bylaws, Kenmure Declaration and KPOA Rules and Regulations. KPOA Rules & Regulations apply to all persons while on Kenmure property. This includes owners, their dependents, guests, visitors, and renters. In addition, all Kenmure Country Club (KCC) employees (including Kenmure 11 LLC, Kenmure 12 LLC and Kemper), non-lot owner KCC members, KCC guests, contractors, subcontractors, and service providers must also abide by these rules.

PROCESS FOR HANDLING PROPERTY OWNER VIOLATIONS

The North Carolina Planned Community Act, 47F-3-102 (11) and (12) and 47F-3-107.1 set forth procedures for fines and suspension of privileges. In accordance with the Planned Community Act, the Kenmure Restated and Amended Bylaws (dated August 5, 2013) outlines a four-step Demand-Notice-Hearing-Appeal process for handling violations by Property Owners. In an effort to quickly and amicably resolve violations, the KPOA Board has added the optional preliminary step of an Informal Demand.

Property Owners are responsible to ensure that all dependents, guests, visitors, and renters abide by KPOA rules, regulations, and covenants. Management of owner violations, or those of their family, guests, visitors, or renters, will be handled in one of the following processes based on the type of violation(s).

Traffic Violations:

Any vehicle being operated in violation of any traffic law or KPOA Rule or Regulation is considered operated in a reckless manner. Violations may be committed by Property owner, renter, members of the household or guests. For each violation in excess of two (2) violations in a twelve (12) month rolling period a fine and/or Kenmure access restriction may be administered. If deemed to be a very serious violation, the sanction (fine and/or access restriction) fine may be administered immediately.

PROCESS:

Demand Letter

In the event of a first or second violation, a Demand Letter will be sent to the Property Owner which documents the violation and explains what action resulted in the violation. The Demand Letter will inform the Property Owner that a third violation within a stated period of time may result in a fine or suspension of privileges.

Notice Letter

After each subsequent violation within the twelve (12) month rolling period a Notice Letter will be sent informing the Property Owner that a fine or suspension of privileges is being imposed. Copies of the Notice Letter(s) should be sent to the KPOA Treasurer and Corporate Secretary. The Notice Letter should include the specific fine and/or sanction. Fines may be up to \$100 for each violation, and can escalate for each day the fine is not paid or the violation continues. Property Owner will also be notified in the Notice Letter of the right to request a hearing by the KPOA Judicial Committee. Request for a hearing must be made in writing delivered to the KPOA Offices within 10 days after the date of the Notice Letter. KPOA Office staff are to inform the KJC and KPOA Corporate Secretary within 24 hours of the request of a hearing. Fines and/or sanctions will be enforced 15

days of the Notice Letter if a hearing is not requested.

Judicial Committee Review

If the optional hearing is requested, it shall be held before the Judicial Committee and the violator shall be given a reasonable opportunity to be heard. Judicial Committee shall render its final decision regarding imposition of the fine or suspension of privileges no later than five days after the hearing and inform the Property Owner and Board of Directors of its decision. If the hearing confirms that a fine or suspension of privileges are warranted, they will be imposed 5 days of the Judicial Committee decision. Fines may be up to \$100 for each violation, and can escalate for each day the violation continues

Appeal to KPOA Board of Directors

Last potential step is the optional appeal to the KPOA Board. The Board is not required to take testimony or have the violator present during the appeal process, but shall review the record created during the hearing before the Judicial Committee. A final decision of the Judicial Committee shall be affirmed unless the Board review determines from the record that the procedures specified in the Act, the Declaration, Bylaws and/or the Judicial Committee Procedures and Rules were not properly followed, or for any other reason the Property Owner did not receive a fair hearing.

Declaration and Rules & Regulation Violations

In the event any Property Owner violates the terms of the Declaration or KPOA Rules & Regulations, KPOA or its duly appointed agent shall give written notice to the Property Owner to cure said violation. In the event of the failure of the Property Owner to cure said violation within thirty days, KPOA shall be entitled to enter upon the property of the Property Owner and remedy such defect including removal of any structure built in violation hereof, all at the expense of the Property Owner. This right of KPOA or its agent shall be in addition to all other general enforcement rights which KPOA may have for a breach or violation of the terms of the Declaration and shall not be deemed a trespass by KPOA or its agent

Documenting Complaints or Violations

Complaints or violations must be in writing and sent to the KPOA Community Relations Board Liaison and describe the specific violation of the Kenmore Declaration or KPOA Rules and Regulations, pertinent facts, and the name of the party making the report. In general, violations of a rule or covenant will be reviewed by the Community Relations Board Liaison and the responsible Committee.

PROCESS:

Optional Preliminary Step: Informal Demand

The responsible Property Owner will be informed by email, phone, or in-person of the first traffic violation as well as the corrective measures that must be taken. Phone or in-person contacts should be documented in writing. In this Informal Demand, the Property Owner will be made aware that a formal "Demand Letter" and possible "NoticeLetter" will follow if the situation is not abated.

In the case of a violation posing an immediate danger to persons or property, or a significant nuisance, the Informal Demand will be made in person or over the phone as soon as the Board or Committee is aware of the violation. The Property Owner shall be informed that they must immediately abate the violation or be subject to a fine or sanction. If not abated, a Demand Letter will be sent to the Property Owner within 72 hours.

Demand Letter

In the event the violation has not been corrected in the allotted time, Demand Letter will be sent to the Property Owner which documents the violation and explains what corrective action are required. The

Demand Letter will inform the Property Owner that if the violation is not corrected within a stated period of time the result may be a fine or suspension of privileges.

Notice Letter

If the responsible Property Owner fails to take corrective action in response to the Demand Letter, a Notice Letter will be sent by Certified Mail informing the Property Owner that a fine, recovery of costs and/or suspension of privileges is being imposed. Notice Letter will include the Property Owner's right to request a hearing by the KPOA Judicial Committee within 10 days after the date of the Notice Letter, as provided in the Declaration. If the Property Owner does not request a hearing, the imposed sanction shall take effect 15 days after the Notice Letter. Sanctions can include paying the costs of KPOA or its agent for remediation of the violation and may also include additional fines and restriction of privileges. Copies of the Notice Letter(s) should be sent to the KPOA Treasurer and Corporate Secretary.

Judicial Committee Review

If the optional hearing is requested, it shall be held before the Judicial Committee and the violator shall be given a reasonable opportunity to be heard. Judicial Committee shall render its final decision regarding imposition of the fine or suspension of privileges no later than five days after the hearing and inform the Property Owner and Board of Directors of its decision. If the hearing confirms that a fine or suspension of privileges are warranted, they will be imposed 5 days after the Judicial Committee decision. Fines may be up to \$100 for each violation, and can escalate for each day fines and/or cost recovery is not handled or the violation continues.

Appeal to KPOA Board of Directors

Last potential step is the optional appeal to the KPOA Board. The Board is not required to take testimony or have the violator present during the appeal process, but shall review the record created during the hearing before the Judicial Committee. A final decision of the Judicial Committee shall be affirmed unless the Board review determines from the record that the procedures specified in the Act, the Declaration, Bylaws and/or the Judicial Committee Procedures and Rules were not properly followed, or for any other reason the violator did not receive a fair hearing.

PROCEDURES CONCERNING NON-PROPERTY OWNERS

Traffic Violations:

New Home Contractors

Traffic violations by individuals that are part of a new home construction are the responsibility of the New Construction Contractor. Demand and Notice Letters should be issued directly to the Contractor. Enforcement procedure steps regarding a New Construction Contractor are similar to a Property Owner with the exception that the Contractor can only make an appeal to the KPOA Board of Directors. Initially, fines will be assessed to the Contractor's refundable construction deposit. If the imposed fines exhaust the Contractor's refundable construction deposit, all future fines for violations will be charged directly to the Contractor. Should the Contractor also be the Owner of the Lot, then once the refundable construction deposits are exhausted, then the Property Owner enforcement actions apply. If fines exhaust the construction deposit, the appropriate Committee (KARC) shall inform the KPOA Director Liaison in case additional sanctions may be required.

Service Providers

Service Providers (e.g. lawn maintenance, tree cutters, painters, roofers, remodeling contractors, etc) are subject to the Bylaws, Declarations, and KPOA Rules and Regulations while on KPOA governed property. Should a service provider be found to commit a traffic violation, the service provider is subject to access restriction to Kenmore and potentially a fine. Duration of the denied access and potential fine shall be determined by the nature of the violation and the abatement actions of the violator. Appropriate sanction

will be recommended by the Security Committee and approved by the KPOA Board. Any appeal of the sanction by the service provider shall be to the KPOA Board directly.

Enforcement for Kenmure Club Members, but not Lot / Homeowners in Kenmure

Individuals who are Kenmure Country Club Members, but not Property Owners in Kenmure, Club guests and Club employees are subject to the Bylaws, Declarations, and KPOA Rules and Regulations while on KPOA governed property. Should an individual(s) be found in violation of the Bylaws, Declaration or KPOA Rules and Regulations, the same enforcement process is to be followed as property owners, but without access to a Judicial Committee hearing. As a courtesy, KPOA will notify the organization managing the Kenmure Country Club of the violation prior to the enforcement process being invoked. The individual may be denied access to Kenmure for a period of time as proposed by the appropriate Committee and approved by the KPOA Board. The duration of the denied access shall be determined by the nature of the violation and the abatement actions of the violator. Any appeal of an access denial shall be to the KPOA Board directly.

Declaration and Rules & Regulation Violations

New Home Contractors

Enforcement procedure steps regarding a New Construction Contractor are similar to a Property Owner, however the ability to fine is limited to the amount of the Contractor's refundable construction deposit. When a fine(s) is imposed, the amount could exhaust the Contractor's refundable construction deposit. Should that occur, the Committee shall inform the KPOA Director Liaison. In this event, the Property Owner becomes accountable for any additional Contractor violations. Should the Contractor also be the Property Owner, then once the refundable construction deposits are exhausted, then the Property Owner enforcement actions apply.

In some cases, it may be appropriate to deal with a Contractor in other or additional manners. Contractors who continuously or deliberately violate building or site construction Rules are subject to an exclusion sanction that would prevent the Contractor from constructing additional homes, or doing other construction work in Kenmure, for a period of time. As an alternative to, or in addition to, an exclusion sanction, the KARC, RMC, or Security may impose a sanction that requires a higher refundable construction deposit on the next home constructed in Kenmure.

Before an exclusion sanction is imposed, however, the New Construction Contractor with the Property Owner, if the Contractor so requests, should be allowed to appear before the applicable Committee to explain why they should not be sanctioned. Final decisions on sanctioning a New Construction Contractor will be reviewed by the KPOA Director Liaison for the Committee imposing the sanction. The Director Liaison must review the circumstances surrounded the pending sanction and will review the facts of the case with the KPOA Board before the sanction is executed. Copies of the final decision should be sent to the KPOA Corporate Secretary.
